Published by the Manager of Publications, Delhi
Printed by the Government of India Press, New Delhi.

1965

PREFACE

This volume combines the 1963 and 1964 issues (New Series No. 12) of the Statistical Abstract and incorporates the latest available data under the important heads of economic and social development. Generally in addition to national aggregates for a period of five to ten years, information in respect of individual States and Union Territories is given for the latest two years. Every year the Abstract introduces new material and eliminates relatively less useful data. The alterations made have been listed in tabular statements on pages v-vi.

2. The publication would serve not only as a convenient source of reference but also as a key to other statistical publications of Central Government agencies. The primary sources are indicated at the foot of each table; the relevant publications of the Departments mentioned will furnish more detailed information. The various sections of the Abstract are preceded by brief explanatory notes which are intended to be read in conjunction with the tables.

3. The continuing co-operation and suggestions for the improvement of the Abstract received from the various Ministries of the Government of India, the State Governments and the public, are acknowledged with gratitude.

4. Figures have been presented throughout in metric units of weights and measures. The co-efficients used for conversion of old units into metric units are given below :

One maund	37·324 kgs.
One tola	11·664 grams.
One ton	1·016 tonnes.
One cwt.	50·802 kgs.
One lb.	0·4536 kg.
One ounce	28·350 grams.
One yard	0·9144 metre
One acre	0·404687 hectare
One sq. mile	2·589998 sq. kilometres.

For conversion of temperature in° Fahrenheit (F) to Centigrade (C) the relation is $C = \frac{5}{9}(F - 32)$.

5. Some of the units of measurement used are :

One lakh = 100,000 (one hundred thousand)
One crore = 10,000,000 (ten million)

6. The following symbols have been used throughout the Abstract :

.. Not available

— Nil or negligible

CONTENTS

SECTION	PAGE
1 AREA AND POPULATION (Tables 1—10)	1
Area and Population : by States and districts—number and population of towns and villages—population : cities—Decennial growth—Proportion of population and area in different density ranges—Ranking of States and Union Territories according to population and area—Economic classification of the population—Expectation of male and female lives at 0,10,20,30,40,50 and 60 in the census years—Population and percentage distribution of numbers of Scheduled Castes and Scheduled Tribes in States and Union Territories—	
2 NATIONAL INCOME (Tables 11—16)	38
Net National Output, Comparative Movement—By Industrial Origin—Government shares —Relationship with other main aggregates of income and product—National income and expenditure.	
3 AGRICULTURE (Tables 17—23)	43 /
Land utilization statistics—area—yield—average yield—agricultural production index—agricultural implements and machinery—Land Revenue and Assessment.	
4 LIVESTOCK AND FISHERIES (Tables 24—30)	71
Number of : Livestock and poultry—Cattles and buffaloes used for work only—Production and utilisations of milk—Production of Raw wool—Fish catch and disposition	
5 FORESTS (Tables 31—37)	79
Classification of area—Revenue and expenditure—Outturn—Gross and net annual increment in stocks—Protection—regeneration and afforestation—employment in forestry and forest industries.	
6 SERICULTURE (Tables 38—40)	89
Total production : Raw silk and silk yarn—Mulberry and non-Mulberry silk.	
7 IRRIGATION (Tables 41—42)	93
Area and crops under irrigation.	
8 POWER (Tables 43—44)	97
Generation and consumption of electricity : Installed Capacity, Kilowatt Hours generated and sold.	
9 MINING (Tables 45—47)	101
Production of minerals and ores—Quantity Index of Mineral Production—working of mines.	
10 INDUSTRY (Tables 48—55)	119
Annual Survey of industries—Mill production : Cotton piece-goods, cotton yarn—Manufacture and issue of Salt—Selected industries—Indices of industrial production.	

CONTENTS—*contd.*

SECTION	PAGE
11 JOINT STOCK COMPANIES (Tables 56—61)	159
Companies at work : number, paid-up capital, companies liquidated, companies registered elsewhere—Index of Industrial profits.	
12 INSURANCE (Tables 62—70)	182
Indian life insurers—Postal insurance fund—Fire, marine and miscellaneous insurance companies.	
13 BANKS (Tables 71—75)	194
Capital, cash liabilities, cheque clearances—Financial corporations : Industrial and State.	
14 CO-OPERATIVE SOCIETIES (Tables 76—83)	205
State co-operative banks, central co-operative banks, primary credit societies—agricultural credit societies—non-agricultural credit societies, grain banks, central land mortgage banks, primary land mortgage banks and primary non-credit societies : number, membership and financial position.	
15 PRICES (Tables 84—88)	223
Index number of wholesale prices—Wholesale prices of staple articles—Working class consumer price index—Consumer price index numbers for industrial workers—Security prices.	
16 TRADE (Tables 89—107)	257
(A) Foreign —By Sea, Air and Land.	
Merchandise and Treasure : Imports, exports and re-exports : Countries of consignment or destination—Currency area-wise—Principal articles of merchandise—Indices of Quantum and Value per unit—Land Frontier trade : Tibet, Nepal, Sikkim and Bhutan—Balance of trade.	
(B) Coasting	
Total value : merchandise and treasure.	
(C) Inland	
Rail and River-Borne trade—Principal articles—States and Chief ports.	
17 BALANCE OF PAYMENTS (Tables 108—109)	308
Current Account—Capital account—Current account : currency area-wise.	
18 RAILWAYS (Tables 110—116)	326
Summary—Passengers—Goods—Capital-at charge—Earnings and Expenses—Accidents to persons.	
19 MOTOR VEHICLES (Tables 117—121)	342
Number taxed—Motor vehicle fees and taxes—State revenue from road transport—State transport undertakings.	
20 ROADS (Tables 122—125)	349
Extra municipal roads : Mileage—Roads—Kuccha and pucca in C.D.&N.E.S. Areas—Public roads in urban areas—Central road fund.	

SECTION

PAGE

21 SHIPPING (Tables 126—135)	359
Vessels entered and cleared with cargoes or in ballast—Foreign and Coastal trade—Shipping at five principal ports—Vessels belonging to or registered in India—Vessels first registered in India—Gross weight of cargo handled at six major ports.	
22 CIVIL AVIATION (Tables 136A—136B)	379
Indian Airlines Operations—Scheduled internal and international services.	
23 POSTS AND TELEGRAPHS (Tables 137—151)	382
Post offices : letters, postcards, newspapers, parcels, packets, money orders, savings bank, capital account—Telegraph and Telephone—Offices and line—Radio telegrams.	
24 TOURISM (Table 152)	400
Number of Foreign tourists who came to India.	
25 NATIONAL FINANCE (Tables 153—160)	403
Budgetary position, revenue and capital accounts : Central and State Governments—Revenue and expenditure on revenue account : Central and State Governments, customs, union excise duties, corporation tax and taxes on income.	
26 INCOME TAX (Tables 161—164)	439
Income-tax, Super-tax and surcharge, Analysis of demand according to class of income : Income-tax, refunds and rebates. Trade classification : Business and Professional income assessed to income-tax.	
27 EXCHANGE, COINAGE AND CURRENCY (Tables 165—177)	460
Money rates—Exchange rates—prices : Government stock, silver and gold—Sterling purchases and sales—Government Promissory notes enfaced for payment of interest—money coined and re-coined—gold and silver : exports and imports—notes issued—notes in circulation—absorption of currency—money supply.	
28 LABOUR (Tables 178—198).	476
Employment : Central Government, Railways, State Governments, Quasi-Government and Local Bodies, factories, mines, plantations, shops and commercial establishments, employment service, earnings, accidents, industrial disputes, workmen's compensation, labour training.	
29 TRADE UNIONS (Tables 199—203)	551
Registered Trade Unions—Workers' unions, Employers' unions—number, membership, income, expenditure and funds.	
30 VITAL AND PUBLIC HEALTH STATISTICS (Tables 204—210)	559
Birth rate—death rate : by causes—Hospitals, dispensaries, beds, patients treated—registered nursing personnel, patients treated by diseases.	

CONTENTS—concl'd.

SECTION	PAGE.
31 EDUCATION (Tables 211—221)	586
Educational institutions—scholars—expenditure : by sources & by types of education—teachers—rural education and expenditure—examination results—education of Scheduled castes, etc.—literacy.	
32 PRINTING PRESSES AND PUBLICATIONS (Tables 222—223)	628
Presses at work, newspapers, periodicals, books published—books in Indian languages.	
33 JUDICIAL AND ADMINISTRATIVE STATISTICS (Tables 224—241)	633
Judicial divisions, officers, cases, civil suits—civil appeals—criminal cases : persons tried, convicted and acquitted—registration of documents—civil police : strength and cost—crimes : cognizable and non-cognizable—property stolen and recovered—police force, equipment and general mangement—prisoners, convicts, jails—sickness, mortality, expenditure	
34 ELECTORAL STATISTICS (Tables 242—244)	698
Elections to House of People—State Legislative Assembly—State Legislative Council.	
35 CLIMATE (Tables 245—248)	702
Rainfall : monthly and annual—temperature : monthly maximum and minimum, monthly mean—relative humidity : monthly mean.	
36 APPENDIX	728
Working of Mines in India for the year 1961—Annual Survey of Industries (Final Results)—registered medical practitioners—Five year plans, principal targets and achievements.	
37 INDEX	755

**Statement showing the tables/sections added or deleted in the current issue
(1963 & 64)**

Sl. No.	Table number in the current issue (1963 & 1964)	Table number in the previous issue (1962)	Description
1	2	3	4
A ADDITIONS			
..			'Appendix' containing (i) working of mines in India for the year 1961; (ii) annual survey of industries (final results); (iii) registered medical practitioners and (iv) five year plans—principal targets & achievements has been included in the current issue.
			<i>Forest</i>
A(i)	32 & 34	..	The scope of the section 'Forest' has been extended to include tables on (i) Revenue and expenditure of forest; and (ii) Gross and net annual increment in stocks of forest produce.
B DELETIONS			
		244-252	Section on 'Local Bodies' has been omitted in the current issue.
			<i>Agriculture</i>
B(i)	..	23	Table on 'Grow more food campaign' has been excluded in the current issue.
			<i>Industry</i>
B(ii)	..	48	Table on 'Census of manufacturing Industries' has been deleted in the current issue.

**Statement showing the changes effected in the Table in the current issue
(1963 & 64) as compared with the previous issue (1962)**

Sl. No.	Section/ Table No. in the previous issue (1962)	Section/ Table No. in the current issue (1963 & 1964)	Changes effected
1	2	3	4
<i>Forest</i>			
1	32	31	The table has been elaborated to include forest area by (i) composition; and (ii) functions.
2	33	32	The scope of the table has been extended to include production of 'pulp and match wood' and 'round wood'.
<i>Sericulture</i>			
3	37—40	38—40	Presentation of data under the section 'Sericulture' has been changed to show production of (i) Raw silk ; (ii) Mulberry silk ; and (iii) Non-mulberry silk.
<i>Industry</i>			
4	49	48	The scope of the table has been extended to show more information regarding value of inputs/outputs.
5	87	86—87	'Working class consumer price index number by centres' has been shown for All-India, Madras, Maharashtra and Rajasthan and for other centres 'consumer price index number for industrial workers' has been shown.
<i>Judicial and Administrative Statistics</i>			
6	236	233	Column Nos. 6 and 7 relating to Armament of the force has been omitted.

AREA AND POPULATION

This is an abstract of the available data concerning the area and population of the Indian Union based on the Final Population Totals of the 1961 Census.

TABLE 1

This table contains data on area (in square kilometres), total population and its classification according to sex and urban and rural population for each State and Union Territory. The 1961 population results do not give the area of Jammu & Kashmir State but according to the latest estimates (as on 31-3-1959) of the Surveyor General of India, the area of the State is 222,800 square kilometres.

TABLE 2

This table provides district-wise data on area, population and its classification according to sex; total and percentage increase since 1951 census; proportion of rural/urban population to 1,000 total population and also density per square kilometre, variation over 1951 Census. Population census in 1951 was not taken in Jammu & Kashmir and as such for purposes of variation, mean of 1941-61 increase has been taken.

TABLE 3

This table shows the number and population of towns in India by classes (I-VI). The various classes of towns are in the following ranges;

- Class I=over one lakh
- Class II=50,000 to one lakh
- Class III=20,000 to 50,000
- Class IV=10,000 to 20,000
- Class V=5,000 to 10,000
- Class VI=under 5,000

Figures for Goa, Daman & Diu are not available.

TABLE 4

This table shows the population of cities (with population one lakh and over) in each State in 1961 along with increase over the 1951 Census.

TABLE 5

This table gives State-wise population enumerated in seven censuses from 1901 to 1961 along with the decennial percentage variations.

TABLE 6

This table explains the figures of density distribution related to percentage of population involved in each density range in the 15 States.

TABLE 7

This table shows the ranking of the States and Union Territories in order of population and area.

TABLE 8

This table explains the economic classification of the population.

TABLE 9

Expectation of male and female lives at 0, 10, 20, 30, 40, 50 and 60 in the census years 1881-1951 for all India have been shown in this table.

TABLE 10

The figures represent the population and percentage distribution of members of scheduled castes and scheduled tribes in States and Union Territories.

AREA AND POPULATION

Source : Registrar General of India,
Ministry of Home Affairs

(a) In the case of Jammu & Kashmir area figure is as given by the Surveyer General of India and relates to the total area of the State whereas the population data exclude population of the territory under military occupation of Pakistan.

(b) A Census of Goa, Daman & Diu was taken by Portuguese Government as on 15th December 1960. The figures represent present population on that date.

(c) Provisional.

(d) Excluding Goa, Daman and Diu.

*Revised.

(*) Census was not held in J. & K. in 1951. Population Estimated as mean of 1941-51

(*) A Census of Goa, Daman and Diu was taken by Portuguese Govt. as on 15th December, 1960. The figures represent 'present population' on that date.

(*) Provisional.

(*) Population for 1901, 1911, 1941 and 1951 have been assumed to be the same as in 1900, 1910, 1940 and 1950 when Censuses were taken by the Portuguese Govt.

(*) 1951 population has been assumed to be the same as in 1948 when a Census was taken by the French Govt.

(*) Excluding NEFA and Tuensang district of Nagaland.

NATIONAL INCOME

The tables presented in this section give the estimates of national income of India, obtained by applying inventory method to as many sectors of the economy as possible; the income method being followed for the remaining sectors. The area and population covered by the estimates pertain to the whole of the Indian Union, including Jammu and Kashmir.

Tables 11 and 12.

The net domestic product at factor cost by industrial origin is estimated for the sectors grouped under —

- (a) Agriculture
- (b) Mining, manufacturing and small enterprises
- (c) Commerce, transport and communications
- (d) Other services.

Table 13.

This table gives the share of Government in the net domestic product and national expenditure. Estimates of gross capital formation on Government account have also been included.

Tables 14 and 15.

These tables give the relationship between national income and some other main aggregates of income and expenditure.

Table 16.

This table gives estimates of net national output at 1948-49 prices by broad industry groups.

NO. 11.—COMPARATIVE MOVEMENT OF NET NATIONAL OUTPUT AT CURRENT AND CONSTANT PRICES

(2) Comprising professions and liberal arts, government services (administration), domestic service and house property.

AGRICULTURE

Available statistics regarding agriculture, in the following tables, cover a period of ten years. While total figures for the whole of India are shown for the earlier years, the state-wise distribution is only for the latest year. Figures relate to the Indian Union and include all states and union territories. The source for the data is the Ministry of Food and Agriculture, who in turn depend on the individual state authorities for primary returns.

Table 17—

Area according to village papers is worked out from the returns prepared by the village staff for revenue purposes, whereas area by professional survey is calculated by the Survey of India. There is a slight difference between the above two sets of figures because of the different methods by which they are calculated and also because some areas are unsurveyed or because no reporting agency exists there.

Forest area presented in the 'Agricultural Statistics' does not tally with the corresponding area given in the publication 'Indian Forest Statistics' because of : (i) The figures presented in the 'Agricultural Statistics' generally relate to the agricultural year (July-June) whereas the 'Indian Forest Statistics' relate to the financial year (April-March); (ii) In the Indian Forest Statistics Returns, the whole area including 'non-wooded' area under the control of Forest Departments is taken as area under forests while in Agricultural Statistics, it is classified according to its actual utilisation; & (iii) Forest Department reports are expected to cover all forest areas in the state but Agricultural Statistics relate only to the 'reporting areas'.

Area not available for cultivation is land which is absolutely barren or uncultivable or covered by buildings, water or roads or otherwise appropriated for non-agricultural purposes.

Other uncultivated land excluding fallows denotes land for cultivation but not taken up and includes culturable waste, permanent pastures and other grazing lands and land under miscellaneous tree crops.

Fallow lands denote culturable areas which after abandonment remain uncultivated over a defined period of varying length in different States up to 1950-51. From 1950-51 a new classification of land area has been adopted under which "fallow lands" have been split up into "current fallows" and "other fallow lands". Standard definitions have now been laid down to be followed uniformly by all States. Lands lying fallow upto a period of one year are included under "Current fallows", those lying fallow for more than one year but less than five years are included under "other fallow lands" while those lying fallow beyond a period of five years are included under "culturable wastes" or under "miscellaneous tree crops and groves" (not included under net area sown) as the case may be. Before 1950-51 the practice differed from state to state, e.g., in Bombay, lands lying fallow up to a period of 10 years were included under fallows while in Punjab those lying fallow for more than two years were classified under "other uncultivated lands excluding current fallows". Thus the figures of land area classification before and after 1950-51 are not strictly comparable.

Net area sown, area sown more than once and total cropped area.—In computing the aggregate *net area sown*, area sown more than once has been counted only once. However, while calculating the total cropped area, if different crops are raised in a year on a given land, the same area is accounted more than once.

Tables 18 and 19 —

Figures are given for area and yield of 33 principal crops. Regular all-India forecasts are issued in regard to most of these crops, *vis.*, all foodgrains, oilseeds, fibres, potatoes, sugarcane, ginger, black pepper, chillies and tobacco. The estimates for coconut are *ad hoc* while the figures for tea, coffee and rubber are based on regular returns received from State Governments.

The figures in respect of cereals and gram relate to both reporting and non-reporting areas while those for other crops refer to reporting areas only. The estimates relating to non-reporting areas are based on special returns from State Governments.

The data relate to crop year ending June unless otherwise stated. Figures for the latest year are the final forecasts while those for the previous year are partially revised estimates as issued from time to time along with the final forecasts. Figures for earlier years are revised estimates.

The variation in coverage and changes in methods of estimation have introduced some incomparability over time. The changes in coverage (area) since 1949-50 do not substantially affect comparability, but improvements in the methods of estimating yield rates and total production (especially in case of foodgrains) were introduced mainly after 1949-50.

The total of area figures shown in table 17 would fall short of the total cropped area by about 10 *per cent* due to the non-inclusion of (i) certain crops, such as condiments and spices, indigo, and other dyes, opium and other drugs and miscellaneous food and non-food crops for which yield figures are not estimated and (ii) non-reporting areas under some of the forecast crops mentioned earlier. Area under principal crops presented in this table does not tally with the corresponding area given in the publication 'Land Utilisation Statistics' because of : (i) There is a difference in the method of recording of area under mixed crops adopted for the two different sets of returns *e.g.* in the case of mixed crops in U. P. ; (ii) The time lag between the presentation of the two sets of figures is also partly responsible for the differences; & (iii) Certain areas *e.g.* hilly areas of Manipur and cultivated patches in forest area of Madhya Pradesh, are reporting for 'Estimates' but not for 'Agricultural Statistics' and *vice versa*.

Table 20—

Average yield per hectare in quintals of 26 principal crops and 3 plantation crops, namely, tea, coffee and rubber is shown in this table.

Table 21—

This table shows the index of agricultural production in India on base crop year ending June 1950=100. The index covers 28 crops divided into two main groups and six sub-groups. Weights have been assigned to different commodities in proportion to the total value of production of each commodity during the base period. The output has been evaluated at annual harvest prices prevailing during the year. In a few cases where reliable harvest prices were not available, average wholesale prices have been used with appropriate adjustment. The crops included and weights allotted to each are mentioned in the table

The index numbers have been constructed by the chain base method in order to provide for changes in the estimated production due to extension in the geographical coverage or to variation in the method of estimation over time. These indices are, therefore, better indicators to be used rather than the absolute figures in analysing the trends of production as a whole or of any of the commodity. The sub-groups, the groups and all commodity index numbers are the weighted arithmetic averages of production indices of crops covered. The concept of production for the series is gross, no allowance being made for seed or wastage. Livestock products and certain minor crops are not included in the index.

Table 22—

This table gives an account of agricultural implements and machinery in actual use as recorded in the quinquennial livestock censuses. Statewise details are also given for the year 1961.

Table 23—

The table shows data concerning estimates of land revenue in different States.

LIVESTOCK AND FISHERIES

Tables 24 and 25

These tables give the number of livestock and poultry and the number of working cattle in India.

Data regarding the number of livestock and poultry, besides agricultural implements (shown separately under Agriculture), are collected through a census conducted quinquennially. In the rural areas primary data are collected through the village revenue agencies where they exist and through other local staff, where they do not. In the urban areas staff of the municipal or notified area committees collect the information. The data are compiled by the Departments of Agriculture, Veterinary or Land revenue, as the case may be, in the different States, and consolidated returns showing district-wise details are furnished to the Directorate of Economics and Statistics, Ministry of Food and Agriculture.

Data collected during the 1951 census have a better coverage than before as a result of political integration of the country after Independence. Orissa and Manipur could not conduct the 1951 Livestock Census and as such data for these States as in 1945 have been repeated. Data for earlier censuses have been shown after adjusting them, as far as possible, to the 1951 administrative set up. But they are not strictly comparable owing to variation in coverage.

Data for 1956 relate to the Reorganised States. The Livestock Census for 1956 was conducted with reference date as 15th April, 1956 in all States except Orissa and Manipur where the census was conducted only in 1957 due to certain administrative and other difficulties.

The livestock census for 1961 was conducted in all states, with the 15th April, 1961 as the reference date; the reference date for Jammu & Kashmir being the 1st of November, 1961.

Tables 26 to 28

These tables give the production of milk and milk products, utilization of milk and estimates of raw wool production in India. Figures for production of milk, ghee and butter are estimates based on the livestock censuses. For consumption of milk, the source is the marketing reports issued by the Directorate of Marketing and Inspection, Ministry of Food and Agriculture.

Tables 29 and 30

These tables give statistics of fish catch and landings by groups of species and their disposition.

FORESTS

Table 31 :

This table deals with area of forest lands as shown in the Reports on Administration of Forests in the different states of the Indian Union. Areas under forest are classified by the types of (i) Composition, namely coniferous (soft-wood) and non-coniferous (broad leaved). Coniferous forest is one in which 80 per cent or more of the volume is of coniferous species and non-coniferous (broad leaved) forest is one in which 80 per cent or more of the volume is of non-coniferous species, both hard and soft; (ii) Functions, namely merchantable and non-merchantable. Forests which are within the reach of economic management or exploitation as sources of forests products including immature forests and managed forests where fellings are prohibited, are known as merchantable forest and forests which are not yet managed or exploited owing to inaccessibility or on account of forest produce in them being unsaleable are known as non-merchantable forests (or inaccessible and unprofitable forests); (iii) Legal Status such as "reserved", "protected" and "unclassified". Reserved forest is one which is permanently dedicated either to the production of timber for other forest produce and in which right of grazing and cultivation is seldom allowed. In protected forests, these rights are allowed subject to a few mild restrictions. Unclassed forests occur mostly in Madhya Pradesh, Assam, Bihar and Bombay and consist largely of inaccessible forest or unoccupied waste; and (iv) Ownership, namely, area owned by (a) Forest Department; (b) Civil authorities (c) Corporate bodies and (d) Private individual.

Table 32 :

Forest produce is classified as major produce and minor produce in this table. The column 'others' under major produce comprises 'round wood' and 'pulp wood' while that under minor produce includes animal products, fibres and flosses, rubber and latex incense and perfume wood, vegetable oils and oilseeds, etc. Figures of quantity along with total value are shown in the case of the former and value only in the case of the latter.

Table 33 :

This table is freshly added to this issue and deals with the revenue and expenditure of forests.

Table 34 :

This table showing Gross and net annual increment in stocks of forest produce, is also a new addition to this issue.

Table 35 to 37

These three tables give figures regarding :

- (i) area of forests protected from fire and cattle.
- (ii) progress of forest regeneration and afforestation.
- (iii) employment in forestry and forest industry.

Total figures have been shown from the year 1950-51 to 1959-60, whereas statewise details are shown for the latest available years.

Further details concerning forest statistics are available in the *Indian Forest Statistics* and other publications of the Ministry of Food and Agriculture namely, '*Agricultural Statistics of India*' Volumes I and II.

(a) The legal classification of forest in Vogue in the state, is demarcated, partially demarcated and undemarcated.

(b) Data for 1958-59 has been repeated.

(c) Exclusive of Pakistan occupied area.

(d) Included in merchantable.

(e) Includes 803 Sq. k. m. occupied by mangroves.

(f) Statewise totals excludes an area of 28 sq. km. of L.M.A. Islands.

(g) Figures relate to State ownership.

(h) Excludes Gujarat State.

(i) Excludes an area of 6949 Sq. km. for which details are not available.

(j) Excludes 5,429-Sq. km. for which details are not available.

(k) Excludes 8 Sq. km. occupied by roads and buildings.

(l) Excludes Jammu and Kashmir

SERICULTURE

Tables 38 to 40

Available data relating to sericulture, which are restricted to the production of raw silk and silk-yarn, have been collected by the Central Silk Board, with the co-operation of sericulture Departments in the States and are presented in these tables.

Raw silk is of two kinds, *viz.*, mulberry and non-mulberry. The distinction arises from the rearing of silk-worms upon either mulberry leaves or other plants. Mulberry silk is produced mainly in Mysore, West Bengal, Jammu and Kashmir, Assam, Punjab and Madras although some other States have made some progress in this direction under their development plans. Non-mulberry silk comprising Tasar, Eri and Muga is produced in Assam, Bihar, Madhya Pradesh, Orissa and West Bengal.

The different types of mulberry and non-mulberry silk and noil are further defined as follows :

Filature Silk.—It is silk reeled in factory-type units from cocoons of silkworms fed on mulberry leaves. There are filature establishments in the States of Mysore, Jammu and Kashmir and Uttar Pradesh (only in Dehradun). Filature silk is considered superior to 'Chark' silk.

Cottage Basin Silk.—Cottage basin silk is the silk reeled on 'Cottage basin' from cocoons of silkworms fed on mulberry leaves. The 'Cottage basin' is an improved reeling equipment superior to Charka and has modern mechanical gadgets capable of yielding better quality raw silk as compared to Charka silk.

Charka Silk.—It is silk reeled in cottage establishments from cocoons of silk worms fed on mulberry leaves. At present bulk production of mulberry silk is reeled on 'Charkas'. Besides, there are different types of 'Charkas' used for reeling non-mulberry silk.

Dupion Silk.—Coarse uneven silk reeled from double Cocoons which are Cocoons spun by two Silkworms. The unwinding of double Cocoons will not be uniform hence unfit for being used in regular reeling.

Tasar Silk.—It is silk reeled from cocoons of silkworms belonging to saturniidae family, which are fed on leaves of Oak, Asan and Arjan trees. Tasar silk is mainly produced in Bihar, Madhya Pradesh, West Bengal and Orissa.

Eri Silk.—It is silk spun from cocoons of silkworms belonging to saturniidae family, which are fed on castor leaves. Eri yarn is produced in Assam, Bihar, West Bengal and Orissa. Unlike other kinds of silk, this cannot be reeled and hence it is only spun. It has natural copperish colour.

Muga Silk.—It is silk produced only in Assam from cocoons of silkworm belonging to saturniidae family, which are fed on Som and Soalu leaves. It has a rich golden colour.

Spun Silk Yarn.—Yarn composed of Silk filaments of lengths ranging from 1 to 8 inches produced by bleaching, dressing and spinning the silk waste which is the by product of the rawsilk reeling industry.

Noil Yarn.—It is short-stapled residue obtained during dressing operations in silk spinning from silk waste. It is a by-product of spun silk industry. Silk yarn can be spun from silk waste and pierced cocoons, which cannot be reeled.

IRRIGATION

Statistics of area irrigated from different sources and total area of crops irrigated are presented under this section. All India totals are shown from 1950-51 and the state-wise distribution is given for the latest year available.

Table 41—

Total area irrigated from different sources in this table represents net irrigated area. If two or more crops on a given piece of land are irrigated in the same year from the same source, the area is counted only once.

Table 42—

Total irrigated area under various crops shown in this table represents gross irrigated area and includes area irrigated under more than one crop during the same year. Area irrigated more than once in a harvest is counted only once.

POWER

Table 43-44 :—

Figures presented in this section relate to installed plant capacity generation and sales of electricity by public utility electric supply undertakings in the Indian Union including Jammu & Kashmir, whether owned by Government, local authorities or companies. Military and factory power stations are excluded as also Railway power stations (with the sole exception of Chola power station, Bombay, which is inter-connected with the Tata power system). Figures for generation include purchases for public supply from non-public utilities. However, power purchased from adjoining State is not included under the purchasing state, as this is already accounted for in the corresponding generation figures of the selling State. State-wise details are given for the latest year.

Figures giving the analysis of installed capacity according to type of plant are as on 31st December, upto 1956 and thereafter as on last day of financial year.

MINING

Table 45 :

Statistics of production of various minerals upto 1955 included in this section are taken from the Annual Review of Mineral Production in India published by the Geological Survey of India. Figures for mines covered by the Indian Mines Act (1923) were collected by the Chief Inspector of Mines and supplemented to the extent possible, in respect of Non-act mines by the Geological Survey of India. From 1956 the bulk of the statistics included here are based on returns received under the Minerals Conservation and Development Rules, 1955 and 1958. The data are collected and compiled now by the Indian Bureau of Mines. The Minerals Conservation and Development Rules are not applicable to (1) Petroleum and natural gas (2) Coal (3) minor minerals declared as such by the Central Government under section 3 of the Mines and Minerals (Regulation and Development) Act, 1957 and (4) any mineral declared as prescribed substance for the purposes of the Atomic Energy Act, 1948. Statistics of coal production are collected from the office of the Coal Controller while those for salt are obtained from the Salt Commissioner. Figures relating to atomic energy minerals are not available for publication. Data for production of crude petroleum are compiled by and have been obtained from the Ministry of Petroleum & Chemicals. Value figures are, however, not yet available. Figures for Mica production upto 1955 relate to dressed Mica and are incomplete. Reliable Statistics of curde Mica production are available from 1956. The basis of valuation for all minerals is the pit's mouth value of production. Data for total value of minerals include estimated value of 'minor minerals' which are outside the scope of Minerals Conservation and Development Rules, but exclude value of petroleum and minerals prescribed under the Atomic Energy Act, 1948. The total value figures upto 1955 include value of dressed Mica output and thereafter the value of crude Mica output. Totals are given for 1951, and for the years 1955 onwards while mineral-wise and Statewise details are shown for the latest two years (1962 & 1963).

Table 46 :

The index of mineral production on base 1960-100 given in this table covers 37 minerals classified into four broad groups according to the Standard Industrial Classification finalised by the Central Statistical Organisation in consultation with the Indian Bureau of Mines, as specified below :

- (1) Coal Mining
- (2) Metal mining
- (3) Stone quarries, clay and sand pits, and
- (4) Other non-metallic mining and quarrying.

Statistics of production given in table 45 provide a framework for the index. Weights have been allotted to the different items in proportion to the net value of production of different minerals in 1960. The index is compiled on the basis of fixed base method. The indices for sub-groups, groups and all minerals are weighted arithmetic averages of the relevant items.

Table 47 :

This table on the working of mines in India relates to mines under Indian Mines Act (1952). Petroleum and salt are the only important minerals not covered by the Act. Totals are given for 1951, and for the years 1955 onwards while mineral-wise details are shown for the late year (1962).

INDUSTRY

This Section deals with the following items :—

- (a) Annual Survey of Industries,
- (b) Production of cotton yarn and piece goods,
- (c) Manufacture of salts,
- (d) Production of certain selected industries, and
- (e) Index of industrial production.

Explanatory notes on the tables under each of the above items are given below :—

Table 48-49

Annual Survey of Industries—The Annual Survey of Industries replaces the Census of Manufacturing industries with effect from 1959. The publication of data obtained through the Annual census of manufactures, conducted under the authority of the Industrial Statistics Act, 1942 covering 29 industries has been discontinued from this issue. These tables give state and industry-wise information on important characteristics of manufacturing industries as published in the first Annual Survey of Industries, 1959 and subsequent Surveys for the years 1960 and 1961. The results of Survey for 1961 are provisional. The annual Survey is conducted under the authority of the "Collection of Statistics Act, 1953" and the "Collection of Statistics (Central) Rules, 1959" framed thereunder.

Scope and Coverage—The coverage of the survey extends to all factories, registered under Factories Act, 1948. The factories in Jammu and Kashmir are covered on a voluntary basis. Data relate to factories employing 50 or more workers with the aid of Power and 100 or more workers without the aid of power.

Period covered—The census relates to the calendar year except in the case of sugar industry for which the year ending 30th June is adopted. Factories engaged in Cotton ginning, cleaning and pressing and Electric Light and Power are as a special case permitted to submit returns for year ending 31st August and 31st March respectively. Factories in Jammu and Kashmir are also permitted to submit returns for year ending 31st March.

Productive capital—It consists of fixed and working capital. The former comprises land, buildings, plant, machinery, furniture, etc., and the latter consists of stocks of materials, fuels, semi-manufactured products, cash in hand and at the bank, etc.

Number of persons employed—This is computed by taking the total attendance of persons in all the shifts on all the days and dividing it by the number of days worked. It includes persons attending, and on leave with pay, and also those engaged in welfare activities.

Workers —The term “workers” is used in the same sense as in the factories Act, 1948 but excludes persons holding positions of supervision or management or employed in a confidential position. Under the factories Act a worker has been defined as “a person employed whether for wages or not in any manufacturing process, or any other incidental or connected work”.

Man-hours worked— “The number of man-hours worked” during the year is calculated by multiplying the number of workers employed in each shift by the number of hours in the shift and aggregating the products for all shifts on all the working days in the year.

Salaries and Wages— The term “salaries/wages” includes all payments made in cash such as basic wages, dearness allowance, overtime payments, shift allowance, leave wages, bonuses etc.

Money value of benefits—These include benefits like supply of cheap foodgrains, medical and educational facilities, payment of pensions, gratuity employers contributions to provident fund, employees State Insurance etc.

Value added by manufacture —“This represents that part of the value of the product which is created in the factory. It is computed by deducting from the gross ex-factory value of output, the value at factory of fuel, materials used, industrial services purchased and depreciation of fixed assets. In the 1961 summary results it also takes into account the value added in merchanting transactions. In 1959 depreciation was calculated at the rate allowed by Income Tax authorities for assessing taxable income while in 1960 and 1961 it was taken as reported in the factories returns.

Table 50—52.

Cotton Mills Production —Detailed data of cotton yarn and cloth production by variety and by States are presented in this section. The information is based on statutory returns obtained under Cotton Textile (Control) Order, 1948. All the units of the organised Cotton textile industry, i.e., both mill and power loom sectors have been covered.

Table 53

Salt —Shows the sources of supply, stocks at the beginning of the year salt manufactured by Government and otherwise, and total issues of locally manufactured salt (including wastage). Figures of production by unlicensed small scale manufacturers are given separately. Figures for the year 1962 and 1963 are shown by sources of supply.

Table 54

Production of Selected Industries in India —The data contained in this table cover 96 industries. Returns are received from producing units on a voluntary basis except in the case of coal, sugar, vegetable oil (Vanaspathi), cotton textiles and iron and steel, where the collecting agencies have powers to call for returns.

Figures for organized industries like steel, salt, coal, sugar, cement, cotton textiles, paper, jute, matches, etc., cover the entire production in the country. Jute production figures from January 1949 relate to mills in the membership of Indian Jute Mills Association which account for nearly 95 per cent of the entire output. Figures for other industries represent all organised factories in those industries but small units have been left out. The data in this table relate to production in all the States in the Indian Union but figures for Jammu and Kashmir are not available except in the case of woollen manufactures and matches. The installed capacity in every case refers to the close of the period.

Table 55

Revised Index of Industrial Production

Base : 1946=100

Coverage—Based on statistics of production set out in Table 56 covering 201 items.

Weights—Weights have been allotted to various items in proportion to the estimates of value added by manufacture in the base year. The respective weights for various industries are mentioned in Table 55.

Computation—Index is a simple weighted arithmetic mean

* Includes 9 factories in Andaman and Nicobar Islands from which no returns were received.

** Includes 8 factories in Andaman and Nicobar Islands from which no returns were received.

(a) Does not include value of fixed capital in respect of 8 factories amounting to Rs. 5 (million) as the details were not reported.

(b) Does not include value of fixed capital in respect of 19 factories in Assam and 9 factories in West Bengal amounting to Rs. 24.6 million and Rs. 5.6 million as the relevant breakdowns under land, buildings, including under construction, improvements, to land and other construction, plant, machinery, and tools, etc. were not reported in their returns.

No. 49—ANNUAL SURVEY OF INDUSTRIES—(BY INDUSTRIES)

Year/Industry	No. of factories registered	No. of factories reporting	Productive capital (Rs. lakhs)	No. of persons employed	Gross output value (Rs. lakhs)	Value added by manufacture net of Industrial service (Rs. lakhs)
1	2	3	4	5	6	7
1961:						
28. Manufacture of rubber products	70	69	24,52	33,303	6,561	22,43
29. Basic industrial chemicals, including fertilizers	101	97	1,11,06	45,529	8,963	28,12
30. Vegetable and animal oils and fats (except edible oils)	8	8	95	1,166	5,08	40
31. Manufacture of paints, varnishes and lacquers	22	22	5,72	5,783	14,06	3,360
32. Manufacture of miscellaneous chemical products	257	249	67,87	6,17,54	1,24,89	39,99
33. Petroleum refineries	5	5	68,97	4,826	47,14	15,30
34. Manufacture of miscellaneous products of petroleum coal	12	7	71	1,714	22,2	68
35. Manufacture of structural clay products	277	268	15,51	46,415	15,48	7,16
36. Manufacture of glass and glass products	138	131	8,93	33,922	15,08	5,68
37. Manufacture of pottery, china and earthen ware	59	58	7,29	17,406	5,64	2,50
38. Manufacture of cement (hydraulic)	30	30	55,96	28,015	53,43	13,25
39. Manufacture of non-metallic mineral products not elsewhere classified	162	153	14,21	25,724	24,21	9,32
40. Iron and steel basic industries	332	312	2,66,49	1,65,311	24,957	65,16
41. Non-ferrous basic metal industries	55	52	25,92	16,842	44,45	10,12
42. Manufacture of metal products except machinery transport equipment	300	286	35,99	54,507	56,20	17,88
43. Manufacture of machinery except electrical machinery	352	345	59,35	95,212	80,73	27,99
44. Manufacture of electrical machinery, apparatus, appliances and supplies	210	200	63,36	74,411	95,28	29,06
45. Ship building and repairing	..	40	17,82	30,335	16,89	7,74
46. Manufacture of rail and road and equipment	124	117	67,16	1,61,809	85,30	36,63
47. Manufacture of motor vehicles	58	57	57,24	48,812	116,29	28,12
48. Repair of motor vehicles	248	237	13,06	33,687	16,04	6,13
49. Manufacture of motor cycles and bicycles	47	46	12,74	16,280	23,47	6,55
50. Manufacture of aircrafts	9	8	16,55	1,6,065	6,34,51	2,69
51. Manufacture of transport equipment not elsewhere classified
52. Manufacture of professional and scientific measuring and controlling instruments	25	25	3,08	5,235	3,63	1,80
53. Manufacture of photographic and optical goods	7	7	20	1,140	52	20
54. Manufacture of watches and clocks	4	4	13	2,90	23	9
55. Manufacture of jewellery and related articles	11	10	4,62	5,271	4,02	1,51
56; 57. Manufacture of musical instruments manufacturing industries not elsewhere classified	152	142	7,40	21,300	16,51	4,84
58 & 59. Electric light and power (generation, transmission and distribution) and gas manufacture and distribution	125	109	1,80,08	40,312	66,17	22,67

11. JOINT STOCK COMPANIES

Statistics relating to Joint Stock Companies are based on returns received from Registrars of Joint Stock Companies.

TABLE 56—58

Statistics are given for number and paid-up capital of companies liability of which is limited by shares only. Industries are classified according to International Standard Classification of Economic Activity adopted in 1954-55. Earlier figures according to old classification were published in previous issues of the Abstract. All figures shown relate to the Indian Union excepting the state of Jammu & Kashmir.

TABLE 59

Number of Foreign companies which carry on business in India is shown in this table. The figures relate to companies incorporated elsewhere than in India, chiefly with sterling capital.

TABLE 60

A series on index numbers of industrial profits (base : 1950=100) was compiled and published by the Reserve Bank of India. This series for the period 1951-58 is presented in table 61. The index has since been revised shifting the base period from 1950 to 1955. The revised index numbers are presented in table 62. The figures for profits used for compiling indices for the year indicated are those for the accounting year beginning July. For the purpose of the index number presented here, profits exclude non-recurring incomes like insurance claims, profit on sale of investments and fixed assets, etc. The following two aspects of profits have been shown :—

(i) Gross profit including depreciation which is the sum of profits before tax, managing agents' remuneration, interest charges and depreciation-provision.

(ii) Profit before tax which is the sum of tax provision, dividends distributed and profits retained in business in the form of transfers to reserves (other than taxation and depreciation) and balance carried to balance sheet correspond to the difference between the profit before tax and tax provision. The definition has changed in the latest year *i.e.* 1958 when the tax cut at source on dividend-income of shareholders is included in dividends and not in tax provision.

The index is based on data of industrial profits in respect of 750 public limited joint-stock companies for the years 1950 to 1955 and 1001 companies for 1956, 1957 and 1958. In

terms of paid-up capital the coverage is about 66 per cent during 1950-1956 and 75 per cent in 1956 of all the companies in the industries covered. The main group indices and the general index are computed by the formula :

$$I_i = \frac{\sum_{j=1}^n P_{ji} \left(\frac{X_j}{x_j} \right)}{\sum_{j=1}^n P_{j0} \left(\frac{X_j}{x_j} \right)} \times 100$$

in which, I_i represents the General Index for the i -th year, P_{ji} profits of the elected companies of the j -th industry for the i -th year, X_j paid-up capital of all companies in the j -th industry as at the end of March 1956, x_j paid-up capital of the *selected* companies at the end of March, 1956, and n the number of industrial groups. In respect of the sample of 1,001 companies, the general index is compiled using the above formula for the year 1956 with base 1955 and this index are then multiplied with the corresponding index for 1955. For 1957, the indices are first compiled with 1956 as base and then multiplied with indices for 1956 and so on for subsequent years.

TABLE 61

The revised index numbers of industrial profits (base : 1955=100) also relate to the sample of 1,001 public limited companies. In addition to this series have also now been compiled for the profits of 333 selected private limited companies comprising 30% of the entire private limited company sector excluding financial institutions and government companies. In the case of public limited companies, for each individual industry, index numbers of gross profits (including depreciation) and profits before tax for the years 1956-59 are worked out by dividing the total profits of the same set of selected companies for each of these years by corresponding figure for the year 1955. The formula for compiling the general index is the same as given above except that size here stands for paid up capital of selected companies at the end of study year 1955.

12. INSURANCE

Figures in this section refer to the insurance business of insurers who transacted business under the Insurance Act, 1938. The Postal Life Insurance Fund (Tables 70 and 71) is, however, exempt from the operation of the Act. From the 1st September 1956, life insurance was nationalised and the existing business of Indian insurers, Indian business of foreign insurers and Provident Societies was vested in the Life Insurance Corporation of India.

LIFE INSURANCE—

Table 62—

This table gives the revenue account of the life insurance business in India. Figures are for the calendar year ending 31st December except in the case of the year 1962 which covers 51 months as L.I.C. have changed over to financial year as their accounting period, from 1st April 1963.

Table 63—

Only important items of liabilities have been shown. They exclude liabilities on account of profit and loss, reserve funds, investment and fluctuation account and other outstanding liabilities. Assets shown are total assets including capital expenditure.

Tables 64 to 66—

Owing to nationalization, figures beyond 1955 in respect of non-Indian Insurers relevant to tables 63 and 64 are not available separately and are included in table 62.

POSTAL INSURANCE

Tables 67 and 68—

Figures are for the financial year April to March. Opening and closing balances include share of Pakistan, as the separation of policies for which Pakistan is liable, has not been completed as yet.

FIRE, MARINE AND MISCELLANEOUS INSURANCE

Tables 69 and 70—

Figures are for calendar year ending 31st December.

(In lakhs of Rupees)

Ministry of Finance

BANKS

The tables in this section present a consolidated picture of progress of banking in India, showing liabilities and assets of several important classes of banks such as :—

- (1) Reserve Bank of India.
- (2) Indian banks comprising—
 - (a) the State Bank of India and other Indian scheduled banks known as Class A1 Banks.
 - (b) Indian non-scheduled banks, *i.e.*, banks not included in the second schedule to the Reserve Bank of India Act. These are subdivided into categories—A2, B, C and D according to the amount of paid-up capital and reserves.
 - (c) State and Central Cooperative Banks.
- (3) Foreign scheduled banks, whose registered offices are located outside the Indian Union.

Besides the above information, tables showing (i) percentage of cash balances to liabilities on deposits of several classes of bank, (ii) total number and amount of cheques cleared, (iii) working of Industrial Finance Corporation of India and (iv) State Financial Corporations are also given.

Some further notes are given below—

TABLE 71—

Progress of Banking in India:

- A : *Liabilities and Assets of Reserve Bank of India (Banking Department)*—Figures relate to the Indian Union.
- B : *Liabilities and Assets of State Bank of India*—State Bank of India was formed in July 1955, after the nationalization of the Imperial Bank of India. Figures in this table relate to the business of the bank both in the Indian Union and abroad.
- C : *Liabilities and Assets of Foreign Scheduled Banks*—Data are as on the date of the balance sheets and relate to their business in the Indian Union only.
- D : *Liabilities and Assets of Indian Commercial Banks*—This table includes commercial bank having their registered offices in the Indian Union. Figures relate to the business of the bank both in the Indian Union and abroad.

E : *Liabilities and assets of Indian co-operative banks*—Co-operative banks included in this table comprise state and central co-operative banks.

TABLE 72—

Relates to percentage of cash balances to total deposits of different Classes of banks as defined above.

TABLE 73—

Cheque Clearance — The table shows the number and amount of cheques cleared at each principal clearing centre managed by the Reserve Bank of India. The total for all other centres comprising clearing houses managed by the State Bank of India, State Bank of Hyderabad and Sangli Bank is shown separately. The management of the clearing house at New Delhi and Nagpur was taken over by the Reserve Bank of India in August 1956 and March 1957 respectively.

TABLES 74 AND 75—

Relate to the working of the Industrial Finance Corporation of India and the State Financial Corporations respectively and furnish data on the liabilities and the Assets of the same.

13. CO-OPERATIVE SOCIETIES

Tables 76—83

The tables in this Section present, in an abstract form, the working of the co-operative movement in India. Separate statements are given in regard to the operation of State Co-operative Banks, Central Co-operative Banks, Primary Credit Societies (Agricultural and Non-agricultural), Grain Banks, Central Land Mortgage Banks, Primary Land Mortgage Banks and Primary non-Credit Societies. State-wise break-up for the latest years is given in respect of all these co-operative banks and societies, except for primary non-credit societies for which the break-up is given according to types. The statistics from different States, except Jammu and Kashmir, pertain to the year ended 30th June. For Jammu and Kashmir the period of reference is the year ended 31st March.

PRICES

Statistics of wholesale prices are based mainly on reports received from government agencies and commercial bodies in important market centres. Information is available concerning almost all the principal commodities that enter into the trade of the country.

Table 84

Index Number of Wholesale Prices in India—This index is compiled by the Economic Adviser to the Government of India, Ministry of Industry & Supply.

From April 14, 1956 a revised index of wholesale prices with base 1952-53=100 is computed in place of the previous price-index with year ended August 1939 as base. While the previous index included 78 commodities and 215 industrial price quotations, the new index includes 112 commodities and 555 quotations divided into six main groups. The index is a weighted arithmetic mean of price relatives. The weights assigned to various commodities are based on marketed value of domestic produce and value of imports inclusive of duty. In regard to manufactures (intermediate and finished products) weights have been fixed according to gross value of products as obtained from Census of Manufactures 1948; as also taking into account the imports. Weight for electricity is based on energy sold by electricity undertakings valued at average all-India rates. Petroleum weights are based on consumption figures. The weights generally refer to the period 1948-49. The weight base is thus different from the comparison base. Data for General Index (revised series) have also been specially converted to old base and shown side by side for comparison. Figures have been obtained on the basis : 100 of the revised series=380.6 (being the average for 1952-53) of the old series.

Table 85

Wholesale Prices of certain Staple Articles of Trade at Selected Stations in India—In this table, price quotations of some important articles, included in the Index Numbers of Wholesale prices have been given. Up to 1956, price quotations are those included in the old series. From 1957, however, a few more quotations used for the revised index of wholesale prices have been added. Figures are given for several varieties in the case of most of the commodities but they generally relate to the chief market only in each case. The figures represent wholesale prices prevailing in markets during the last week of each month. Annual figures are averages of months.

Tables 86 & 87

In the Second Five Year Plan, it was recommended that steps should be taken to initiate family living surveys for the revision of old series of consumer price indices at different centres. Accordingly, fresh family living surveys among working class population were conducted at 50 important factory, mining and plantation centres of the country during the period September, 1958 to August 1959. These surveys were conducted on a uniform basis at all the centres under the guidance of the Technical Advisory Council on Cost of Living Index Numbers. On the basis of these surveys Consumer Price Indices for 41 centres out of 50 have so far been published by the Labour Bureau and are presented in table 89. At the recommendation of the Technical Advisory Committee the calendar year 1960 was adopted as the base year. This has also been approved by the Central Technical Advisory Council on Statistics.

Since new indices are not yet available for all the centres the All-India Index is still being published based on the old series (27 centres). In table 88 index number of consumer prices (working class) with base shifted to 1949=100 for all-India, Ajmer, Bombay and Madras, are published. For a brief note on the scope, coverage and method of computation of the series, please refer to earlier issues of this publication.

The weighting diagram for each new series of Index numbers for industrial workers is based on an average expenditure pattern of families (including single member families). All expenditure, as revealed by the family living survey, has been included in the weighting diagram except non-consumption expenditure. The expenditure on items not included in the index has been imputed to those included on considerations of similarity of price-trends.

Index numbers have been compiled on the basis of the Laspeyre's formula as weighted averages of price relatives, the weights being the relative expenditure. For details of the method of computation please refer to "A Guide to Consumer Price Index Numbers—Labour Bureau Pamphlet Series 2".

Representative markets at each centre have been selected for collection of prices on the basis of market enquiries. At the factory centres, arrangements have been made for periodical rent surveys in order to reflect six-monthly changes in house rent. On the basis of these surveys, the index of house rent will be revised twice a year. At the mining and plantation centres, houses are mostly provided free by employers and hence at these centres the rent index will be kept stationary at the base value. The prices of fruits and vegetables for a particular month of the current year are also compared with the prices prevailing during the corresponding month of the base year (1960) to correct for large seasonal changes in prices.

Table 88

Index Numbers of Security Prices—The index number of security prices is a general purpose index compiled by the Reserve Bank of India. These series have been revised with effect from the first week of April, 1953. The average for 1953, thus relates to 39 weeks, ending December. The base period has been changed from the calendar year 1938 to the financial year 1949-50 up to June 1957 where after the base period is 1952-53. The method of compilation has been slightly modified in as much as in the revised series the chained index numbers of the sub-groups are weighted instead of weighting the link-relatives.

In compilation of index 468 scrips are included. These scrips were selected from among those quoted on the Bombay, Calcutta, Madras and Delhi (for variable dividend industrials) stock exchanges on the basis of importance of concerns to which they related and their activity in the market. The scrips were classified into four groups and thirty-eight sub-groups. Weights allocated to each of them were proportionate to the total amount of loans outstanding, in the case of *government and semi-government securities* and to the market value of shares during the base period in the case of *fixed-dividend and variable-dividend industrial securities*. Indices are calculated from weekly average prices for the selected scrips. Average quotations of the scrips during the base year represent arithmetic mean of daily quotations for the whole year. Monthly and annual indices are similar averages of weekly figures.

⁽¹⁾ Annual figures are averages computed from monthly averages and refer to calendar years. Monthly data represent averages of weekly index numbers.

⁽²⁾ Figures have been obtained on the basis : 100 of the new series = 380.6 (being the average for 1952-53) of old series.

(1) Annual averages are simple arithmetic average of weeks.

(2) Figures from 1957 relate to the revised series on 1952-53 base.

(a), Average of 39 weeks ending December, 1953.

TRADE

(A) FOREIGN TRADE

The figures represent trade with foreign countries both on private and government accounts, registered at Indian sea and airports, including also land frontier trade with Pakistan, Afghanistan, Iran and Burma as registered at the land customs lines. Trade with Tibet, Bhutan and Sikkim and the trade arising in the Andaman and Nicobar Islands and the Laccadive, Minicoy and Amindivi Islands are excluded. In the case of Nepal air-borne trade alone is included.

STATISTICAL YEAR—

Simultaneously with the adoption of standard International Trade classification, since January 1957, there has been a change in the statistical accounting year. The foreign trade statistics of India were previously published on a financial year (April-March) basis, but from January 1957 are compiled on calendar year (January-December) basis. However, the financial year basis has been re-adopted with effect from April 1960.

IMPORTS—

(Tables 89 to 91, 94, 95, 97, 99 and 102)

Import figures generally show the trade as declared by importers in the bills of entry (applications for clearance) and as checked by customs officials.

Goods entered for storage in bonded warehouses and afterwards exported therefrom are included under 'imports' and 're-exports'. Trans-shipment trade is not recognised for the purposes of Indian trade returns and is, thus, not included here.

Trade of foreign countries on the border of India, passing in transit through Indian ports, on through bills of lading, from and to overseas countries, is included under 'imports' and 're-exports' respectively. The transit trade of Pakistan has, however, been excluded from the general import and re-export with effect from April, 1952.

Imports of passengers' baggage are not included unless they are dutiable. All dutiable articles imported from foreign countries by parcel or letter post are included.

EXPORTS AND RE-EXPORTS—

(Tables 89, 90, 92 to 94, 96, 98, 99 and 101)

Export figures represent the trade as declared in the manifests, of vessels cleared, which have been received and scrutinized with reports of notice of short shipment up to the last working day of the month or as near to that as is practicable but not earlier than 26th of the month. From the year 1951-52, however, a revised procedure for the registration of export trade statistics was adopted. The export trade statistics are now being compiled on the basis of trade as declared in the shipping bills passed up to the last working day of the month with necessary adjustments on account of short shipments. The figures of exports relate to Indian merchandise alone as distinct from exports of foreign merchandise which are classed as re-exports.

*Total value of such trade is also shown separately in the *Monthly Accounts relating to the Foreign Trade and Navigation of India* from April 1949 to December 1956 and thereafter in the *Supplement to Monthly Statistics of the Foreign Trade of India*.

The classification of countries by 'commonwealth countries' and 'other foreign countries' followed in earlier issues of the Abstract for table on countrywise imports, exports and re-exports has been discontinued and the countries are listed in alphabetical order in tables 91—93 in this issue.

All articles despatched to foreign countries by parcel post are included but the contents of foreign letters despatched are not registered.

CLASSIFICATION OF TRADE BY COUNTRIES—

(Tables 91 to 93, 97 and 98)

Imports are classified with reference to the countries whence they were consigned to India and not with reference to the countries whence they were shipped direct to India. The country of consignment is defined as that from which the goods have come whether by land and sea or by sea only or by air, without interruption of transit save in the course of transshipment or transfer from one means of conveyance to another. Thus the countries whence goods are consigned are not in all cases the countries of actual origin of goods since goods produced in one country may be purchased by a firm in another country and thence despatched after an interval to India.

Exports are credited to the country of final destination as declared by exporters in the shipping bills whether that country possesses a sea-port or not. The country of final destination is defined as that to which goods exported from India are intended to pass whether by sea and land or by sea only or by air without interruption of transit, save in the course of transshipment or transfer from one means of conveyance to another.

The figures are those declared by importers and exporters in the bills of entry and shipping bills. The value of goods represents of the wholesale cash price less trade discount for which goods (i) the like kind and quality, are sold or are capable of being sold at the time and place of importation or exportation, as the case may be, without any abatement or deduction whatever, except in the case, of goods imported of the amount of duties payable on the importation thereof; or (ii) where such price is not ascertainable, the cost at which the goods of the like quality could be delivered at such place without any abatement or deduction except as aforesaid. Import valuation in practice corresponds to c.i.f. method, but export valuation was, prior to April 1951, not strictly on f.o.b. basis as it did not take into account export duties and such items as dock charges, cost of transport, etc., up to the vessel. With effect from April 1951, however, the basis of export valuation has been changed so as to conform strictly to f.o.b. basis inclusive of export duty and/or cess where leviable.

CURRENCY AREAS—

(Table 94)

The following classification has been adopted from the year 1956-57 ;

Dollar Area.—United States of America, Canada (including Newfoundland and Labrador), Cuba, Haiti, Dominican Republic, Puerto Rico, Virgin Islands of the United States, Mexico, Guatemala, Honduras (not British), Salvador, Nicaragua, Costa Rica, Columbia, Republic of Panama, Panama Canal Zone, Venezuela, Ecuador, Bolivia, Hawaii, Philippines, Liberia and American Samoa.

Sterling Area :—All Commonwealth countries (excluding Canada) together with Irish Republic, Iceland, Jordan, Muscat and Oman, and Burma. Iraq has been transferred to 'other soft currency areas' subsequent to June, 1959.

Other Soft Currency Area.—All other countries.

Currency area figures include the latest adjustments and, therefore, do not always tally with the figures in the preceding tables.

TREASURE—

(Tables 97 and 98.)

Imports and exports of gold were recorded separately under 'treasure as distinct from 'merchandise' till December 1956. From January 1957 silver is included in merchandise trade while gold continues to be recorded under 'treasure'. The value of gold represents the market value at the time and place of import and export, as the case may be.

INDEX NUMBERS OF QUANTUM AND UNIT VALUE OF EXPORTS AND IMPORTS

(Tables 99—101)

The first series, on index numbers of exports and imports was calculated with reference to the year ending March, 1923 as base. Figures upto 1948-49 given in Table 99 relate to this series converted to the year ending March 1939, as base. Owing to far reaching changes, in the pattern of trade as well as in coverage of the statistics, specially after partition, a new series calculated with reference to the year ending March, 1949 as base, was introduced with effect from 1949-50. Re-export trade which was excluded from the old series was included in the export trade for the purposes of this index. To fit in with the changing pattern of India's foreign trade, another revised series with 1952-53 as base was introduced with effect from 1953-54. Re-export trade was again excluded from the export index. Subsequent to the adoption of the Standard Indian Trade Classification in 1957, the wide disparity between the old and the new classification necessitated shifting of the base to a SITC period. Since the data for the first year (1957) of the revised classification was deficient in many ways, the year 1958 has been chosen as the new base period for the present revised series of index numbers.

A reference may be made to the earlier issues of the Statistical Abstract for notes relating to the scope, coverage and methods of construction of the earlier series of the index numbers. The present revised series with reference to period 1958 as base is described below:

Scope and Coverage

The change in the base period to 1958 has rendered the new series for import trade index more representative than the previous series. The total value of articles included in the new imports index accounts for a coverage of 84% of the total value of imports of all articles as against 70% in the old series. Coverage of exports index, however, remained the same at 92%. The number of articles directly taken into account in calculations of the present series number to 511 for imports and 317 for exports. Larger coverage is

not attempted with a view to facilitating expeditious computation of the index numbers.

Method of Construction

As in the case of old series, the revised Index Numbers are of the fixed base type. The unit value (Price) Index Numbers are calculated according to the Paasche formula. The Quantum Index Numbers according to Laspeyres formula are not computed separately but are derived from the former Indices.

The method of calculation of unit value Indices briefly consists of comparing the trade in the current period with that revalued at 1958 prices. Symbolically, the Index Number P is given by the formula:—

$$P = \frac{\sum p_n q_n}{\sum p_0 q_n}$$

where, P_0 and P_n denote the value of an article in the base period and the current period respectively, and q_0 and q_n its respective quantities in these periods respectively.

As mentioned above, the Quantum Indices are derived from the unit value Indices (P) as follows :

$$Q = \frac{V_n}{V_0} \div P \times 100$$

where, V_0 and V_n are the total values of trade in the base and current periods respectively.

Adjustment for Incomplete Coverage

It is not possible in practice to include all the commodities entering into trade since information on quantities is lacking for many miscellaneous items in the trade records. Such items cannot be included in the cross-valuations and hence do not appear directly in the compilation of Index Numbers. Adjustments have, therefore, been made in the final Index Numbers to allow for incomplete coverage. These adjustments are based on the assumption that the price changes in the items not covered in a section are similar to those shown by the items included in the calculation for the section. The method of adjustment can be explained symbolically as below :

The unit value Index (P) for the included items in a section is given by the formula :

$$P = \frac{\sum P_n Q_n}{\sum P_0 Q_n} \quad (g)$$

The index for all the items of the section¹ will be

$$P' = \frac{\sum' P_n Q_n}{\sum' P_0 Q_n} \quad (2)$$

while the aggregate $\sum' P_n Q_n$ is known, the aggregate $\sum' P_0 Q_n$ is unknown and it cannot be computed directly. It is therefore estimated on the assumption that the price changes for the covered items and for all the items are the same. In other words, $P' = P$

$$\begin{aligned} \therefore \sum' P_0 Q_n &= \frac{\sum' P_n Q_n}{\sum' P_n Q_n} \times \frac{\sum P_n Q_n}{\sum P_0 Q_n} \\ &= \frac{\sum' P_n Q_n}{\sum P_0 Q_n} \\ &= \frac{\text{Total value of all items in the section}}{\text{unadjusted Index for the section}} \end{aligned}$$

The adjusted Index Number P' is obtained by substituting the above value of $\sum' P_0 Q_n$ in the equation (2). The General Index is taken derived by averaging the separately adjusted sectional indices appropriately.

Quantum Indices are similarly adjusted for incomplete coverage by using the adjusted unit value Index P' instead of the unadjusted Index (P) occurring in the formula for deriving the Quantum Indices.

Adjustment for Seasonal Variations

For want of figures according to the revised trade classification for a long number of years, adjustments could not be made for seasonal variations. The adjustments will be made when the required data are available.

OVERALL BALANCE OF TRADE

(Table 102)

From April 1948 total values of foreign trade of India by all route (i.e., sea, air and land) have been taken into account for purpose of calculating the balance of trade. All foreign trade transactions in gold, current notes and coins are included under treasure. Balance of trade in treasures is in gold and silver only upto December 1956 and gold only thereafter since trade in silver is included under merchandise.

LAND FRONTIER TRADE

(Table 103 and 104)

This portion deals with the trade with Tibet, Nepal, Sikkim and Bhutan as recorded at certain railway stations adjacent to the land frontier routes in the absence of a customs barrier. Only quantities are shown. Values are not recorded at present.

(B) COASTING TRADE

Tables 105 and 106

Coasting trade statistics represent the trade registered at the ports in States (old Provinces), that is, the trade between one State (old Province) on the one side and all other States (old Provinces and former Indian States, such as Kutch, Travancore etc.) *plus* certain other ports on the Indian coast (*e.g.*, Goa, etc.) on the other. The trade among ports within the same State has not been included into the table presented here. Cochin Port which was a part of Madras block prior to April 1951 has from then date been constituted into a separate block.

Prior to April, 1957, the Indian Coasting Trade was recorded according to the following Maritime Blocks:—

- (1) West Bengal, (2) Orissa, (3) Madras, (4) Travancore-Cochin
(5) Cochin Port, (6) Bombay, and (7) Saurashtra, Okha and Kutch.

Consequent upon the reorganisation of the States, the following Maritime Blocks each of which corresponds to a Maritime State or Union territory, have been adopted from April, 1957 :—

- (1) West Bengal, (2) Orissa, (3) Andhra Pradesh, (4) Madras
(5) Kerala, (6) Mysore, (7) Bombay, (8) Andaman and Nicobar Islands
and (9) Laccadive, Minicoy and Amindivi Islands.

Further, Consequent on bifurcation of Bombay State, two separate maritime blocks (i) Maharashtra and (ii) Gujarat are being shown from April, 1961.

For the purposes of trade and tariff, Pakistan was declared to be a foreign country with effect from 1st March 1948, and hence the coasting trade of India with Pakistan ports is excluded from that date.

The figures show generally the trade as declared in the shipping documents duly scrutinised and passed through the customs houses. The term 'Indian merchandise' comprises all goods that are of the growth, produce or manufacture of India. Indian merchandise is distinguished from foreign merchandise in the declaration of importers or exporters made in the bills of entry or shipping bills from which the trade statistics are compiled. Passengers' baggage, postal transactions and merchandise transhipped at Custom ports are excluded from the scope of these statistics. Imports and exports of treasure which include gold and silver (bullion and coin) only are recorded separately and are not included in the figures of merchandise. From 1st April, 1948, the distinction between private merchandise and Government stores has been abolished and combined figures of trade under both these categories are published.

In the values of articles imported or exported as recorded in the coasting trade, customs and excise duties previously paid are included.

The year refers to the period of twelve months, April to March. From 1958 figures were compiled on calendar year basis.

The financial year basis has been re-adopted with effect from April, 1960.

(C) INLAND TRADE

Tables 107A & 107B

Nature and scope—Inland Trade Statistics represent only the movement of Trade by railways and steamer services, into and from a State taken as a whole or a chief port or ports, the trade of which is registered separately from that of the state in which such port or ports may be situated. Movement of trade by other means (*e.g.* road, air, country boats etc.) is thus excluded from the scope of these statistics.

Trade Blocks—Prior to April, 1962 there were 29 Trade Blocks. The list has since been amplified with a view to taking into account the bifurcation of the erstwhile Bombay State into Gujarat and Maharashtra. For the purposes of the accounts, ~~the~~ ^{from} April, 1962, India is divided into 31 Trade Blocks, representing the States and Centrally Administered Territories of Indian Union as constituted under the States Reorganisation Act., 1956, and the Bombay Reorganisation Act, 1960, Pondicherry, Karikal and Goa except Andhra Pradesh, Gujarat, Kerala, Madras, Maharashtra, Mysore and West Bengal which have been constituted into more than one Trade Block.

Method of Registration—The figures represent actual imports into each trade block. According to arrangement in force, each of the railways and steamer companies register such traffic as is received at stations on its line within a particular trade block from other trade blocks, without taking into account the traffic enroute to another station whether within or without the same trade block. In case of Tripura, however, there is no railway or steamer station or out-agency within the trade block, and special arrangements have been made to record the trade. The trade of this block is recorded by the following agencies:

- (i) in respect of trade *via* Eastern Bengal railway by five land customs stations on the Tripura Eastern Pakistan border;
- (ii) in respect of trade *via* Patharkandi station on the Assam-Tripura border, by the North East Frontier Railways.

River borne trade—The statistics cover only the trade carried by the India General Navigation and Railway Companies Ltd. and Rivers Steam Navigation Co. Ltd. between the Trade blocks mentioned below and no account is taken of (a) trade carried by other steamer owners or boat-owners between these trade blocks or (b) river borne trade between other trade blocks.

- (1) Calcutta.
- (2) Assam.
- (3) West Bengal (excluding Calcutta).

For the purposes of registration, trade originating in a railway and transhipped, under through-booking arrangements, at a railway station to a steamer for conveyance to a river station, is treated as carried wholly by rail, and as received at the transshipment station on the destination side.

Articles and Units of measurement—The trade in certain staple articles: only is recorded and the weight recorded is the net weight *i.e.* the gross weight entered in the invoices less certain fixed percentages which have been taken to represent the weight of packing etc. Values are not recorded. Figure of oil-seeds represent the trade in the following varieties: (i) Castor. (ii) Cotton seed, (iii) Ground nuts, (iv) Linseed, (v) Rape and mustard. (vi) Til or *Jinjili*. Cotton piece goods include both Indian and foreign cloth. Jute raw includes both loose and pucca bales. Raw cotton figures do not make distinction between ginned and unginned.

Period—Figures relate generally to the financial year April—March: but in the case of raw cotton figures relate to the year September–August.

(1) Includes re-export.

(2) Figures for 1956-57 relate to 9 months ending December 1956. From January 1957 silver figures are included under Merchandise.

(3) Includes Government of India coins.

(4) Includes trade of Goa, Daman, and Diu and also the trade arising in the Andaman and Nicobar Islands from April 1963.

Note—Figures are compiled on calendar year basis from 1957 to 1959.

BALANCE OF PAYMENTS

The balance of payments is a record of economic transactions of the residents of a country with the rest of the world on account of goods exported and imported, services rendered and received and transfers of capital. Residents cover nationals as well as non-nationals residing in the country. Foreign students, tourists, foreign diplomatic officers and international institutions are not considered to be residents but diplomatic officers and armed forces of the country, stationed abroad, are treated as residents notwithstanding their physical location.

India's balance of payments statistics presented in this section are derived for the most part from exchange control records. The figures relate to Indian Union and include Indo-Pakistan transactions also.

Tables 108 & 109

Current Account.—Economic transactions that enter the current account of the balance of payments are of the following types. A surplus on current account leads to an acquisition of assets or re-payment of debts previously contracted and a deficit involves withdrawal of previously accumulated assets or is met by borrowings.

Merchandise—The figures refer to recorded transactions and include estimates of unrecorded imports paid with Indian currency notes but exclude transactions under Government barter deals. Imports are inclusive of insurance and freight although these two elements come, strictly speaking, under the category of services. Exports are f.o.b. Gold transactions are recorded separately under the head "non-monetary gold".

Transportation—Receipts include charges, etc., met by foreign ships in Indian ports, while payments cover operating expenses abroad of Indian steamship companies and some freight payments.

Investment income—Receipts include interest and discount on the investments of the Reserve Bank of India.

Government not included elsewhere—The payment figures represent disbursements of the Government such as those for the upkeep of its offices abroad as also contributions to international organisations.

Miscellaneous—This item covers, in the main, receipts and payments for services such as those for agency services and film rentals and maintenance of estates.

Donations—These are mainly unilateral transfers like gifts, maintenance allowances, family remittances and remittances received by missionaries. Also include aid received under Colombo Plan and Indo-U.S. Technical Co-operation agreement.

Errors and Omissions—This is a reconciliation entry to balance the difference in the total debits and credits. These differences arise due to difference in timings between the two arms of a transaction or their coverage.

2. Capital Account :

This account indicates how the transactions under the current account affect the country's investment position abroad. Explanations of the various categories included are given below :—

1. (a) *Private Long-term Capital*—Transactions covered are mainly cash transfers and do not include investments in the form of goods brought from abroad or the re-invested earnings of foreign controlled companies in India.

(b) *Private Short-term Capital*—Mainly includes seasonal capital received from abroad for financing foreign owned plantations and net charges in the short-term indebtedness or claims abroad of business institutions.

2. *Banking*—This excludes transactions by Reserve Bank of India. Figures are available only from 1957. Earlier data is included under *official*. Figures for 1957 are incomplete to the extent that, certain banking sector liabilities to non-resident government institutions, are included under official sector for want of details.

3. *Official* (including R.B.I.)—Comprise (a) *Loans*—Credit side includes drawings on various loans and credits obtained by the country, *vis.*, I.B.R.D. loans, U.S. Export-Import Bank & D.L.F. Loans, Japanese Yen Credit, U.K.—India oil pipeline credit, credits arranged for industrial enterprises and Barauni Refinery, West German credit for capital goods, loans under U.S. Government's P.L. 480 and P.L. 665 programmes, etc. Debit figures include repurchases of rupees from the I.M.F. and extension of loans to Burma.

(b) *Amortisation*—The debit-side includes repayments of I.B.R.D. D.L.F., T.C.A. loans and Bhilai Credit. The credit entries relate mainly to repayment by the U.K. of the Excess Pensions Fund.

(c) *Miscellaneous*—Include changes in the P.L. 480 and P.L. 665 balances and rupee liabilities of the Reserve Bank of India to non-resident official and semi-official institutions.

(d) *Reserves*—Cover changes in foreign exchange assets of the Reserve Bank of India and the Government.

Figures for 1951-1956 of the Banking Sector are also included under the official sector for want of details.

Regional Balance of Payments—Current Account—This table provides data on the regional aspect of the current account. The area-wise division of current transactions shown is based on definitions of these areas current during the various periods concerned as detailed below:—

Sterling Area—All Commonwealth countries (*excluding* Canada and Newfoundland) together with Burma, Jordan, Libya, Muscat & Oman, Irish Republic and Iceland.

Dollar Area—Covering United States of America, Canada (*including* Newfoundland), Cuba, Haiti, Dominican Republic, Puerto Rico, Virgin Islands of the United States, Mexico, Guatemala, Honduras (not British), Salvador, Nicaragua, Costa Rica, Colombia, Republic of Panama, Panama Canal Zone, Venezuela, Ecuador, Bolivia, Hawaii, Phillippines, Liberia and American

Samoa. Figures for 1951 and 1952 refer to "Hard Currency Area" comprising the United States of America, other American Account Countries, Canada, Liberia, Argentina and Japan. The last two ceased to be hard currency countries from January 1951 and October 1951, respectively.

O.E.E.C. Countries.—Covering Sweden, Norway, Denmark, West Germany, Netherlands, Belgium, Luxembourg, France, Portugal, Switzerland, Italy, Austria, Greece and Turkey.

(1) Includes figures of the O.E.E.C. countries also in the year 1951.

RAILWAYS

Table 110A—116.

Route-Kilometres of the Railways.—In calculating the length of route double or treble lines are counted only once.

Gross Earnings and Working Expenses.—Represent total earnings and expenses of railways in an accounting period irrespective of whether the earnings have been realised or expenses paid. Gross earnings include all earnings from passenger traffic, goods traffic, parcels, luggage and other miscellaneous sources of revenue, while working expenses include all expenses incurred for maintenance of structural works, supply of loco power, carriage and wagon stock, ferry steamers and harbours as well as the expenses of traffic departments, general and electric service departments and other miscellaneous expenses.

Train Kilometres.—Include the kilometres run by trains carrying passengers or goods or both as well as the kilometres run by empty trains. No deduction is made for departmental trains.

Number of Passengers and Metric Tons carried.—In Table No. 110A the figures represent the number of passengers and weight in metric tons of goods originating on all Railways, while in Table No. 110B they represent the total number of passengers and total weight in metric tons of goods carried on individual railways. In the latter case, passengers travelling over two or more railways or two or more gauges of the same railway are treated as having performed two or more journeys. The figures relating to metric tons of goods carried are also recorded in the same manner.

Passenger-Kilometres and Net Metric Ton-Kilometres—The figures under these heads are the real indices of the volume of passengers and goods traffic handled. These are arrived at by multiplying the total number of passengers carried and the total metric tons of goods carried by the respective number of kilometres over which they are moved.

Accidents—The figures exclude persons killed or injured in railway workshops.

Source : Railway Board,
Ministry of Railways.

(1) With effect from 1st April 1955 the pre-existing First Class was abolished and the Second and Inter classes are re-named as First and Second Classes respectively.

(2) These figures represent the number of passengers and—metric tons of goods originating on all railways and are not the total of figures shown in the large table relating to number of passengers and quantity of goods carried and the earnings derived therefrom by Railways which represent total number of passengers and goods carried on individual railways.

(3) Suburban only.

(a) Pre-April 1955.

(b) 1st Class/pre-April 1955 and class

(c) 2nd class/pre April 1959 Inter

*From 1961-62 rates refer to broad gauge only.

MOTOR VEHICLES

Table 117 :—

Number of Motor Vehicles taxed during the last quarter of the year—
The figures shown in the table may be taken to represent the bulk of the serviceable vehicles.

Table 118 :—

State Revenue from Road Transport—The State Governments, in addition to motor vehicle Taxes and Fees, levy sales tax on motor spirit and tax on passenger and goods carried. The Sales Tax on motor spirit is levied at varying rates under varying conditions in the different States. In some cases, the levies on Motor Spirit are made under the general Sales Tax Act and in other cases under special Motor Spirit Sales Tax Act. Taxes on passengers and goods carried by road or on inland water-ways under entry 56 of List II of the Seventh Schedule of the constitution are levied in Andhra Pradesh, Assam, Bihar, Gujarat, Kerala, Madhya Pradesh, Madras, Maharashtra, Mysore, Orissa, Punjab, Rajasthan, West Bengal and Himachal Pradesh.

Tables 119 and 120 :—

Revenue from State Motor Vehicles Taxes and Fees in India.—Direct taxation of motor vehicles in India is a State subject. Taxes are levied under various State 'Taxation Acts' and the basis and incidence of taxation vary from State to State. Fees are levied under the Motor Vehicles Act, 1939, which is a Central Act and Motor Vehicles Rules framed by the State Governments thereunder. These include (a) fees for issue and renewal of driving licences, issue of duplicate licences, tests of competence to drive and (b) others which include fees for issue of registration certificates and duplicates thereof and issue of permits for operation of transport vehicles. Annual figures are compiled from returns, in prescribed forms, received from various States in pursuance of a decision taken at a meeting of the Transport Advisory Council held in 1939.

Table 121 :—

Transport Undertakings of various States—Almost all the major States of India have accepted nationalisation of bus services as a basic policy and many have nearly taken over the entire private bus transport in their area, with a view to ensuring autonomy and efficient administration. The nationalisation of road transport is mostly confined to the passenger traffic so far.

- (a) Excludes figures for Assam which accounted for about 2 % of total fees in 1952-53.
 (1) Annual figures in columns 2 and 3 do not add up to the totals in col. 4 since break up by fees for licensing and renewal of licences etc. and other fees is not available for certain states not necessarily common from year to year. The coverage of col. 4 is, however, complete.
 (2) From State Budgets (Actuals). Break up not available.
 (3) Relate to 1959-60.

(a) Figures for 1953-54 and 1954-55 exclude Assam, West Bengal and PEPSU. These States, accounted for nearly 12 % of total revenue from Motor Vehicle taxes in 1952-53.

(b) Taxed private cars or taxicabs.

(c) From State Budget (Actuals). Break up not available.

(2) As break-up for some states (not necessarily common from year to year) is not available in respect of Col. 2 to 9, they do not add upto totals given in col. 10.

(1) Figures relate to 1959-60.

(+) Provisional.

(2) Estimated.

ROADS

Tables 122—124

Length of Extra-Municipal Roads (classified according to surface).—The figures are compiled annually from the returns, in the prescribed forms, received from various States according to recommendations of the Conference of British Commonwealth Statisticians held in Ottawa in 1935. These statistics relate to extra-municipal roads maintained by public authorities, i.e., roads outside the area or jurisdiction of a Municipality, Town or City Corporation or other urban body. These roads are maintained by (a) Public Works Department and Military Engineering Service and (b) Local bodies. The Roads maintained by the M.E.S. are generally in Cantonnments where the M.E.S. are the executing agency for P.W.D. These returns do not include military roads but they include roads, classed as national highways. In addition to these there are also roads constructed in the Community Development and National Extension Service Blocks which came into existence after 2nd October, 1952, and public roads in urban areas in different States of India. Separate tables giving the length of roads in C.D. and N.E.S. Blocks as on 31st March, 1961 & 62 and public Roads in urban Areas as on 31st March, 1960 and 61 are included. Various types of roads, classified according to surface, are defined below :—

Bituminous roads have surface dressing with tar, bituminous or asphalt including gouding sheet asphalt, etc.

Concrete roads include surfaces dressed with cement concrete or cement bound macadam.

Water bound macadam roads have surfaces of broken rock metal hankar, laterite or brick metal.

Lower type roads are unmetalled roads of artificially admixed granular material or natural soil-motorable and unmotorable.

National Highways are highways running through the length and breadth of the Indian Union connecting major ports, foreign highways and capitals of States and include roads of strategic importance, thus constituting the main arteries of communication in the country. The system of National Highways came into existence on 1st April, 1947 from which date the Government of India assumed complete financial liability for maintenance and development of roads included under the system. The National Highways Act, 1956 laid down that the Government of India are responsible for developing and maintaining all the National Highways; but they may direct that any function in relation to development and maintenance of any National Highway

shall also be exercisable by the Government of the State within which the National Highway is situated or by any officer or authority subordinate to the Government of India or to the State Government.

Length of extra-municipal Roads (classified according to functions)

Roads have been divided into following classes :—

- (i) National Highways, which would traverse several States and be of national importance for strategic, administrative or other purposes;
- (ii) State Highways, which connect with the National Highways or with the highways of the adjacent States, district headquarters and important cities of the States ;
- (iii) District roads, which serve areas of production and markets in the district connecting them with one another or with other highways and railways;
- (iv) village roads connecting villages and groups of villages with one another and with the nearest district roads, highways, railways or river ghats.

From 1919 to 1947, the provinces have been solely responsible for the construction and maintenance of roads. The Central Government assumed, with effect from 1st April, 1947, complete financial responsibility for the development and maintenance of every road accepted by the Central Government as a National Highway. From that day the States were left with the entire responsibility for the development and maintenance of the other roads mentioned above.

Table 125—

Central Road Fund Statistics.—The Central Road Fund came into being in 1929-30, on the recommendations of the Jayakar Committee. The fund was built up out of an additional tax of two annas (now 2½ annas) a gallon on motor spirit. A part of the fund (now one-fifth) has been reserved for works of special or all-India importance, the balance being allocated to the States for approved works. The basis of allocation has been determined by the ratio of the consumption of motor spirit in each administrative unit. The fund is non-lapsing but the credits are subject to the annual vote of the Parliament. The Central Reserve was originally fixed by the Legislature in 1930 at 1/10th of the Central Road Fund. It was subsequently raised to 15 per cent in 1937 and 20 per cent in 1949. Data relate to the Indian Union.

SHIPPING

Tables 126 to 135:—

Indian shipping statistics are confined to foreign and coastal traffic only; data for inland shipping being far too meagre at present. Number of ships include their repeated voyages, *i.e.*, if a ship performs more than one voyage, it is treated as more than one vessel. Tonnage recorded except in table 131 is net tonnage, *i.e.*, volume of enclosed spaces of vessels less crew space, engine room and other space not used for cargo; and the unit of measurement is a ton of 100 cu. ft.

Figures for sailing vessels include only square rigged type while those which are not square rigged are taken as country craft. Figures for country crafts are not separately recorded from April, 1955.

Vessels in foreign trade are recorded as entering on the voyage inwards at the first Indian port and as clearing on the voyage outwards at the last Indian port at which cargo is laden. If on their inward voyage, they enter a port in India in ballast or to discharge a part of their cargo and then proceed to other ports in India, their clearances and entries after the first port are recorded in the coasting trade. Similarly if vessels, on the voyage outwards, are loaded with part cargo for a foreign port and part for some other port or ports in India, they are recorded at the first port of departure as cleared in the coasting trade and again recorded as cleared in foreign trade at the last Indian Port. The arrivals of vessels at a port in India for the purposes of discharging cargo and their departure from a port in India after loading cargo are recorded as arrivals or departures *with cargo*.

The arrival of vessels at port at which no cargo is discharged and departure of vessels from ports at which no cargo is loaded are recorded respectively as arrival and departure in *ballast*.

CIVIL AVIATION

Tables 136A & 136B

The statistics relate to all traffic (both revenue and non-revenue loads carried by Indian airlines on their scheduled services. Data for Internal and International Services, have been shown separately. Services operated to adjacent countries, *vis.*, Pakistan, Burma, Ceylon and Nepal are included under Internal Services.

Further details are as below :—

Hours flown—These figures represent the total number of hours flown by individual planes.

Kilometres flown—These figures represent the total kilometres flown by individual planes.

Capacity metric ton kilometres—The figures are obtained by multiplying the total tonnage offered to the public for air transportation of passengers freights and mails by the kilometres flown.

Passengers, freight, mails and newspapers carried—The number of passengers carried represents the total number of passengers carried on different air-routes treating passengers travelling by planes for two or more routes as having performed two or more journeys. The figures relating to the weight of freight and mails carried are also derived in the same manner.

Passenger kilometres—The figures are obtained by adding up the kilometres travelled by each passenger.

Load metric ton-kilometres—Represent aggregates based on the product of the tonnage of freight or mails, as the case may be, and the distance through which the load was carried. The figures relating to total load—metric ton-kilometres take into account all kinds of traffic, including passengers.

POSTS AND TELEGRAPHS

Tables 137 to 151

This section presents operating and financial data relating to the different branches of the Posts and Telegraphs Department, including the Post Office Savings Bank. They comprise statistics of the number of offices and the length in kilometer of telegraph lines as well as the volume of traffic handled by those offices and/or sent over the wires. It is possible with these data to make a study of the growth of traffic against the background of expansion of facilities and *vice versa*.

Receipts under postage (table 142) include both sale of stamps and postage paid in cash, *e.g.*,—(i) postage prepaid in cash in post offices, (ii) credits afforded in the schedule of customs duty on account of postal redirection fees and insurance fees realised on delivery of inward foreign parcels, (iii) charges for resetting franking machines, and (iv) cash realised for unpaid or insufficiently paid postal articles. Statistics relating to Telegraph offices (table 145) maintained by the department independently or in conjunction with another office or by a licensed administrator have been included. Statistics of registered articles are actuals. In the case of unregistered postal traffic (letters, postcards, parcels, packets and newspapers) it is not possible to maintain day-to-day statistics of the *actual* number of articles. Unregistered traffic is, therefore, estimated from a count of the articles in all post offices in India taken during one week in the busy season and one week in the slack season.

Radio telegraphs (table 149) includes only messages sent to ships from coastal offices.

(a) From the year 1951-52 the Revenue Receipts of Telephone Districts Bombay, Madras and Calcutta are merged with miscellaneous Revenue.

TOURISM

Foreign Tourists Coming to India

Table 152

Tourist traffic covers persons visiting India for a period of not less than 24 hours and not more than six months, for purposes of business, holiday, pleasure, study, reasons of health, domestic reasons, attending meetings or in a representative capacity of any kind, e. g., diplomatic, scientific, administrative, religious, athletics. The term "tourist" excludes a large number of travellers, viz., migrants, persons in transit, transport crews, troops, etc. It also excludes foreign students even though they receive remittances from their home countries. Visitors coming from Pakistan are also excluded. Tourist statistics, enumerated in this table, therefore, do not provide a total picture of the volume of tourist traffic. The tourist traffic has been classified according to the countries of origin of the tourists.

(c) Figures are exclusively for Dubai.

NATIONAL FINANCE

The tables contained in this section show (i) the overall budgetary position of Central as well as State Governments as available from the budget papers and (ii) the transactions on revenue account of Central Government and State Governments with individual details of actual cash receipts and disbursements as distinct from amounts due to or amounts payable, available from the "Combined Finance and Revenue Accounts of the Central and State Governments of India."

Table 153 : The overall budgetary position of the Central Government showing figures for total plan periods for the First and Second Plans together with actuals for 1961-62, 1962-63 and revised estimates for 1963-64 and budget estimates for 1964-65 have been given. Greater details of various items under Revenue Account and Capital Account have been given for similar period in sub-tables A and B of the table 153.

Table 154: The overall budgetary position of the State Governments showing figures for total plan periods for the 1st and 2nd Five Year Plans together with actuals for 1961-62, 1962-63 and revised estimates for 1963-64 and budget estimates for 1964-65 have been given. Greater details of Revenue Account and Capital Account have been given for similar periods in sub-tables A and B of table 154.

Table 155: The consolidated budgetary position of Central and State Governments giving total of figures presented in tables 155 and 156 has been given in this table.

Table 156: The table gives a summary statement of the revenue and the expenditure on revenue account of Central and State Governments. Revenue comprises proceeds from taxation and other receipts classed as revenue, excluding borrowings, small savings, foreign aid, etc. The expenditure met from the revenue is treated as expenditure charged to revenue. The net result of above transactions represents the surplus or the deficit for the year on revenue account. Part A of the table presents data for the Central Government and those States which correspond to the reorganized set up. Data prior to 31-10-56 is for pre-reorganised States. Data in part 'B' of the table relates to States which have ceased to exist as such after re-organization.

Tables 157—160 :

Detailed figures of receipts and expenditure on collection of customs, union excise duties, corporation tax and taxes on income other than corporation tax and estate duty have been given for 1950-51 and 1953-54 to 1961-62. Figures in tables 155—157 have been taken from Reserve Bank of India bulletin and those in tables 158—162 have been collected from the Office of the Comptroller and Auditor General. For details regarding the scope of each item of account for which data are presented, the publication 'List of Major and Minor Heads of Account, of the Central and State Governments, Receipts and Disbursements' may be consulted.

SOURCE :—*Reserve Bank of India.*

NOTES : The figures of total revenue and expenditure as given in the table differ from those in the Budget Papers as receipts from forests, opium and currency and mint are shown on a net basis and States share of union excise duties and additional duties of excise are excluded. Budget estimates for 1964-65 related to those presented to the Lok Sabha. Owing to changes in accounting classification the figures from 1962-63 particularly in respect of items VII, X, XII, and XVI are not comparable with those for earlier years. Figures under revenue and expenditure from 1957-58 include selfbalancing items in respect of (1) grants under P.L. 480 and (2) Steel Equalisation (3) Emergency Risks (Goods and Factors) Insurance Funds for 1962-63 and 1963-64 (Budget and Revised):

- (c) Excludes forests, opium and States' share of Union excise duties and additional excise duties.
- (d) Comprises General Administration, Audit, Administration of Justice, Jails, Police, Tribal Areas and External Affairs; with effect from 1961-62 expenditure relating to Tribal Areas is adjusted under the relevant Major Heads most closely connected with the object of the expenditure. From 1962-63 this includes Miscellaneous Department of Administrative nature and Supplies and Disposals.
- (e) Include appropriation for reduction or avoidance of debt. From 1962-63, these include interest charges on Capital advanced to Commercial Department like Railway, Posts and Telegraphs which are hitherto booked in the accounts in reduction of receipts.
- (f) Include provision for grants to States for G.M.F. Schemes relief in natural calamities etc. From 1954-55 these items are transferred to miscellaneous expenditure under appropriate ministries: from 1961-62 these figures are shown against item XVII. Since 1957-58 it includes provision for transfer to the Special Development Fund of grants received under P.L. 480.
- (g) Include certain grants to States; for 1961-62 these grants are shown against item XVII.
- (h) Comprise irrigation and multi-purpose river schemes, ports and pilotage, lighthouses and lightship, scientific departments, education, medical, public health, agriculture, rural development, animal husbandry co-operation, industries and supplies upto 1961-62, aviation, broadcasting, civil works, post-war reconstruction and electricity schemes community development projects, national extension service labour and employment Overseas Communications Service and miscellaneous departments.
- (i) Include grants-in-aid to States: all grants to States are grouped together in this item for 1961-62.
- (j) Comprise famine, stationery and printing, civil defence and pre-partition payments.

(a) Difference represents the Share of PEPSU State adjusted by the A.G.C.R.

INCOME TAX

Statistics presented in this section relate to the assessments on account of Income-tax, Super-tax and Surcharge made by the Income-tax Department. The figures refer to regular assessments made under the Income-tax Act and do not include demands raised for advance payment, provisional assessments or miscellaneous demands like penalties, warrant fees, etc. Figures of taxes represent the demand raised and not the collections actually made against those demands. The scope of the Income-tax Act was enlarged from 1950-51 by extending it to the whole of India except the State of Jammu and Kashmir. From 1954-55, this state is also included.

Table 161-162

These tables analyse the demand for income-tax and Super-tax according to the revised classification in regard to classes of assessee *viz.*, (i) individuals, (ii) Hindu undivided families, (iii) unregistered firms and other associations of persons, (iv) registered firms, and (v) companies and other concerns assessable at company rates. This revised classification was adopted from 1953-54. The statements are designed to show the total tax demand (including surcharge) payable by assessee and net income left in their hands after payment of tax. The number of assessee shown are in respect of each assessment made on them and an assessee having more than one assessment made on him during the year is counted more than once. Figures for the latest year *i.e.*, 1961-62 are presented separately by ranges of total income assessed and by States while all-India totals are given from 1953-54. The figures for the income tax-payable in case of All India (New Series) for the year 1961-62 have been shown separately under income-tax, Super-tax and Surcharge while the tax-payable figures for Statewise (New Series) are the total taxes inclusive of income-tax, Super-tax and Surcharge.

Table 163

The table analyses the demand of income-tax during the year 1961-62 according to the source of income assessed and refunds and rebates allowed. The unclassified demand and refund are cases arising as a result of rectifications, appeals, revisions, etc. The number of assessee shown is in respect of each source of income. An assessee having income from more than one source is included under each one of the source from which the income is derived.

Table 164

Income from "Business and Professions" and tax thereon is analysed in this table. The classification closely follows the 1951 Income Census Economic Classification.

EXCHANGE COINAGE AND CURRENCY

This section presents data on exchange and money rates, prices of bullion and government securities, coinage and currency.

TABLE 165

Money Rates in India—Money rates may be defined as the rates at which the various classes of banks in the country are prepared to discount or rediscount bills of exchange, to give loans and advances, or to accept deposits. This table contains the highest and lowest of money rates ruling during the year (April to March) from 1955-56 to 1963-64.

Bank Rate—The standard rate at which the Reserve Bank of India is prepared to buy or rediscount bills of exchange or other commercial paper eligible for purchase under the Reserve Bank of India Act.

State Bank of India hundi Rate—The rate at which The State Bank discounts first class three months' commercial bills.

Call Money Rate—Relates to inter-bank advances repayable on call at the option of the lender.

Bazar Bill Rate—Rate at which bills of small traders are reported to have been discounted by shroffs. These are unofficial quotations.

TABLE 166

Foreign Exchange Rates—Represent the selling rates in Bombay and are the averages of working days during the period. From June 15, 1955 they relate to free market-rates except for U.S. dollar, Canadian dollar, U.K. Sterling and Pakistan rupee. Free market rates for U.S. and Canadian dollars were introduced from Sept. 3, 1956 and for Pakistan Rupee from Sept. 2, 1958. The French Francs were devalued on December 27, 1958 and subsequent rates relate to 'Heavy Franc'.

TABLE 167

Prices of India Government Stock—quotations represent the actual prices of the principal Government of India securities. The quotations at Bombay and Calcutta Stock Exchanges are furnished by the brokers and are the average of selling prices at the close of the working days during December each year.

TABLE 168 AND 169

Prices of Gold and Silver—Spot quotations showing the highest, lowest and average prices of silver in London, New York and Bombay and of gold and sovereigns in Bombay. Average prices are the averages of closing quotations for working days. The spot-prices of gold relate to Mysore gold up to July 13, 1958. Abyssinian gold from July 14, 1958 to July 31, 1959 and gold-bullion thereafter.

Stock figures are the averages of week-end stocks.

TABLE 170

Number and Value of Coins minted—Figures are shown separately for Bombay and Calcutta mints.

Indian mints have also minted coins for foreign countries like East Africa, Ceylon, Malaya, Straits Settlements, Iraq and Egypt. The number and value of such coins, together with those minted for Indian States have been shown separately within brackets below the figures of Indian money.

Classification has been made according to the metal of coins. The denominations of Indian coins included under each metal are explained below:—

Silver—Includes quarternary rupees, half rupees and quarter rupees. The issue of quarternary (silver) rupee coins was discontinued from end of May 1946.

Nickel—Only one-eighth rupees and one anna pieces were struck in nickel till 1946-47, when nickel half rupees and quarter rupees were also introduced. Nickel rupees were first struck during 1947-48. Nickel half anna was also introduced simultaneously. Nickel 50 Naye Paisa, 25 Naye Paisa were introduced in 1960-61.

Nickel Brass and Cupro Nickel—Include one-eighth rupees, one anna and half anna pieces. Also include 10 naye paise, 5 naye paise and 2 naye paise, introduced on 1st April 1957. and Nickel Brass one Naya Paisa from 1961-62.

Bronze—Includes single pice, half pice, and naya paise, pieces. Naya paisa is introduced on 1st April 1957.

TABLES 171 AND 172

Import and Export of Gold and Silver—Figures represent the export and imports of bullion and coins on private and Government accounts. Foreign sea-borne trade of Kutch has been included from 1st June, 1948 and of Travancore, Saurashtra and Baroda from 1st April, 1949. But the trade arising in the Andamans and Nicobar islands and the Laccadive Minicoy and Amindivi islands as well as the land-borne trade with Tibet Nepal, Sikkim and Bhutan is excluded.

Government of India rupee and half-rupee coins are shown at face value.

TABLE 173

Circulation of India Notes by Denominations—Figures in this table relate to value of total notes issued (i. e. notes in circulation plus notes held in Banking Deptt. of Reserve Bank of India). Data exclude the Government of India one rupee notes (introduced in July, 1940), which are treated for the purposes of the Reserve Bank of India Act as rupee coins.

Notes of the denominations of Rs. 500, Rs. 1,000 and Rs. 10,000 were demonetised in January, 1946. New high denomination notes for Rs. one, five and ten thousands were again issued from April 1954.

Figures are net of India notes returned from circulation in Aden, but are inclusive of Rs. 43 crores of India notes returned from circulation in Pakistan and awaiting adjustment.

TABLE 174

Statistics of Note Circulation—Figures are for the last Friday of the year ending March. Figures are net of adjustments made on account of (i) transfer of liabilities to the State Bank of Pakistan in respect of inscribed Pakistan

notes issued between April and June 1948, (ii) cancellation of India notes returned from circulation in Pakistan under Section 4(2) of Part IV of the Pakistan (Monetary and Reserve Bank) Order, 1947, as amended, and (iii) India notes returned from circulation in Aden during the period October 1951 to 1952. Figures include *Hali Sicca* notes up to December 1957.

Rupee Coin—Circulation of rupee-coin relates to quarternary rupees, nickel rupees and Government of India one rupee notes which are treated as rupee-coin. Figures are net of an estimated amount of about Rs. 15 crores of India rupee-coin in circulation in Pakistan but are inclusive of *Hali Sicca* Rupee-Coin up to December 1957.

TABLE 175

Money Supply with the Public—Money Supply with the public relates to private holdings of currency and demand deposits held by the public in banks. Figures include small coins. Notes in circulation are net of the return of Rs. 43 crores from Pakistan awaiting adjustment. Deposit money with the public comprise net demand liabilities of banks and other deposits with Reserve Bank.

TABLE 176

Absorption of Currency—Figures relate to the Indian Union and are inclusive of notes and coins held by banks and at treasuries as also Indian currency in circulation outside India but exclude *Hali Sicca* currency. Adjustments have not been made in regard to the issue from January 26, 1950 of Indian currency in Hyderabad. Figures are, however, net of return of about Rs. 43 crores from Pakistan awaiting adjustments and net of adjustments made in respect of India notes retired from circulation in Aden.

Rupee coin—Includes quarternary and nickel rupees. Government of India one rupee notes are also included.

TABLE 177

Absorption of Small Coin—Figures relate to the Indian Union.

(e) The rise is due to remittances in transit not having been taken into account.

(f) Twenty-five naye Paise (g) Fifty naye paise.

LABOUR

This Section presents data in respect of employment, wages and earnings, industrial disputes, industrial injuries and labour training.

Details are given below—

Employment—

Attempts have been made in this section to cover statistics regarding employment both under the public and private sectors as far as figures are available. Tables 180—182 give a complete picture of employment in public sector.

Table 178—

This table relates to employment in Central Government establishments. The table is based on the information collected every month by Director General of Employment and Training, through Employment Exchanges. The information contained in this table excludes employment in Railways and in Embassies and Missions abroad. Collection of information in respect of this table has now been dropped in view of the collection of information in respect of public sector. (Table 181).

Table 179—

This table relates to establishments under Central Government, State Governments, quasi-Government and Local Bodies. The information is based on the data collected by the Employment Exchanges as part of a programme for collection of employment market information on quarterly basis.

Table 180—

This table relates to employment in Railways. As the regrouping of Government Railways was completed on 14th April 1952, zone wise information regarding employment in Railways is available only from that year. Information regarding employment in Works and Projects includes Chittaranjan Locomotive Works, Ganga Bridge Project and Integral Coach Factory from 1955 and Railway Electrification. Project from 1956 onwards. Besides, employment data for Non-Government Railways and for Railway Board and other Railway offices are also given in this table. The employment data include class I to IV permanent and temporary employees.

Tables 181-A & 181-B—

Statistics relating to employment in factories are collected under the provisions of the Indian Factories Act, 1948. The coverage under Act extends to all factories employing 10 workers or more with the aid of power and 20 workers or more without the aid of power. The State Governments are also empowered under Section 85 of the Act to notify factories which are not covered by

the two groups of factories mentioned above. The statistics presented in the tables include information relating to such factories also. The employment figures represent "average daily employment". The figures of Average daily employment are furnished by each factory by dividing the total attendances (man-days) during a year by the total number of working days during the year. Thus the measure of employment is based on attendance and not on the physical number of persons on rolls. Coverage by States of the data presented in these two tables is given below.

Table 181A—

Except for Col. 2 regarding "all factories" the data upto 1955 relate to the former Part 'A' and Part 'C' States of Delhi, Ajmer and Coorg. Territories merged with Part 'A' States during this period have been gradually covered. Data from 1956 onwards relate to re-organized States with the following year to year exclusion. Data for 1956 exclude Kerala, Mysore, Rajasthan and Union Territories other than Delhi. Those for 1957 exclude Mysore and Manipur, for 1958 exclude only Mysore and those for 1959 exclude Kerala and Manipur. Data for Jammu & Kashmir from 1956 onwards have not been available and hence are excluded. Data from 1956 onwards include estimated information relating to average daily employment in factories not submitting returns whereas, previously these related to only factories submitting returns. The data are therefore not comparable from year to year. For 1956 onwards figures have been demarcated by a deep line in order to indicate non-comparability.

Coverage by State of the data in Col. 2 in this table is the same as given for table 181B below.

Table 181B—

State-wise details regarding number of factories and average daily number of workers employed in each industry during the year 1961 are given in this table. Annual totals for each State are also shown from the year 1951. The all-India totals upto 1955 relate to all former part 'A', 'B' & 'C' States. Totals from the year 1956, relate to reorganized States with the following exclusions. Figures for 1957 to 1960 exclude J. & K. and further exclude Manipur in 1957, and Mysore in 1958.

Table 182—

Average daily employment in factories according to three broad age-groups and sex is shown in this table. In the Indian Factories Act, 1948, the following changes were made in the definition of adult, adolescent and child, as compared to the Factories Act, 1934.

	<i>Under the old Act</i>	<i>Under the new Act</i>
Adult	One who has completed 17 years.	One who has completed 18 years.
Adolescent	One who has completed 15 years but not 17 years.	One who has completed 15 years but not 18 years.
Child	One who has not completed 15 years (children below 12 years not permitted to work)	One who has not completed 15 years (children below 4 years not permitted to work).

Table 183—

Information regarding average daily number of workers employed in all mines (total) and in 15 important mines individually is given in this table. The method of computation of average daily number of workers employed is the same as given above for table 203 A & B. Under the statutory provision of Mines Act, the Chief inspector of Mines collects information regarding number of persons employed in and about mines and quarries (except those specially exempted by Central Government). Upto 1953 the information regarding employment in mines was collected under the Indian Mines Act 1923 and thereafter it is collected under the Indian Mines Act 1952. The scope of the Act changed slightly from time to time. For example by a Notification of March 1955, a number of hitherto exempted stone, lime stone and sand excavations were brought under the provisions of the Act.

Table 184—

This table shows the average daily number of persons employed in tea, coffee and rubber estates. The Directorate of Economics and Statistics, Ministry of Food and Agriculture, collects figures of employment from Coffee and rubber estates every year through State Governments. The data for employment in Tea plantations is based on the publication 'Tea Statistics' published by Tea Board. All workers in garden and outside, are covered. According to instructions laid down, each estate furnishes figures of 'average daily employment' by dividing the total man-days worked during a year by a standard figure of 300 working days. The figures of 'average daily employment' for individual estates are added up to obtain the 'average daily employment' for each industry viz., tea, coffee and rubber.

Table 185—

Statistics of employment in respect of shops, commercial establishments and restaurants, registered under the Weekly Holidays Act or Shops and Commercial Establishments Acts in the various States are given in this table. These Acts are in force only in certain urban areas, covering municipal areas, towns and cantonments, and hence the statistics are limited to shops and commercial establishments in such areas. Further, there is no regular arrangement for collecting annual returns on employment from the individual units covered by the Acts and the employment data are collected specially by the State Governments at the request of the Labour Bureau. In some cases, the employment data were compiled from the figures furnished by the employers at the time of registration of the unit under the Act and in other cases they were collected specially by the inspectors appointed under the Acts directly from the individual establishments. The Inspectors generally estimated the number of persons employed and it does not appear that any uniform measure of employment, e.g., "average daily employment" for a period or "number on rolls" on a particular day was adopted.

Employment Service—

Statistics in this sub-section show the working of the Employment Exchanges under the control of the Directorate General of Employment and Training, Ministry of Labour and Employment. The nature of work undertaken by the Employment Exchanges consists of registering people who are seeking employment and securing employment for them.

Table 186 A—

This table shows the number of applicants on the live-register of Employment Exchanges, according to the broad occupational groups, for the

years 1950-1959. Employment Exchanges are no more collecting information under the occupational groups mentioned in this table. From 1960 the information regarding applicants is collected for revised occupational group and is shown separately in Table 186-B.

Table 187—

This table shows the number placed in employment through the employment exchanges according to the nature of service and placements of certain special categories of applicants.

Wages and Earnings of Factory Employees—

The statistics in respect of wages and earnings of factory workers are collected under the Payment of Wages Act, 1936 and relate to factories as defined under clause (m) of section 2 of the Factories Act 1948. The statistics are based on factories reporting and hence are subject to errors of varying non-response from year to year. The Payment of Wages Act, till 1957 applied to employees in factories covered by the Act, earning less than Rs. 200 per month. In 1958 the Act has been amended bringing within its scope employees earning Rs. 200 and more but less than Rs. 400 per month also. After the amendment of the Payment of Wages Act, 1936 in 1958 an attempt was made to collect the statistics for 1958 onwards in two parts one part relating to employees earning less than Rs. 200 per month and the other part relating to employees earning Rs. 200 or more but less than Rs. 400 per month. Figures of average per capita annual earnings are arrived at by dividing the total earning by average daily number of employees. Earnings include basic wages, allowances, annual bonus and money value of concessions.

Table 188—

This table shows the total annual earnings of factory workers in each State.

Table 189—

This table shows the average annual earnings of a factory worker according to States.

Table 190—

This table shows the average annual earnings of factory employees by industries.

While computing the figures of average annual earnings, the groups of industries consisting of Food beverages, Tobacco and Gins and Presses have been excluded as these groups contain mainly seasonal factories where the annual earnings of workers rarely relate to a whole year and therefore would not be comparable with the data on earnings, in the case of perennial factories. Railway workshops are also not covered in these statistics.

Table 191—

Information regarding per capita average monthly earnings of Tea plantation labourers in Assam is given in this table. For the purpose of these statistics a labourer is defined as a person working on wage not exceeding Rs. 50 per month (excluding a clerk, domestic servant or a mechanic, carpenter, mason, brick-layer or

other artisan). The figures are based on Tea estates submitting returns. The coverage is, therefore, incomplete and varies from year to year. The figures in respect of the years prior to 1953-54 are based on two months average (March and September, whereas those for 1953-54 and later years are average of the 12 months of the respective year.

Table 192—

The data for coal-mines relate to average weekly earnings in December each year, whereas those for other mines relate to average daily earnings in December each year. The average weekly cash earnings in coal mines are computed by dividing the total payments during the first complete working week in the month of December by the average daily attendance during the week. The average daily earnings for mines other than coal are computed by dividing the total payment for December by the corresponding aggregate daily attendance.

Table 193—

This table shows statistics of injuries resulting from accidents in factories collected under the Factories Act, 1948. Data relate to all former part 'A' States and Part 'C' States of Delhi, Ajmer and Andaman and Nicobar Islands upto 1955 and thereafter to the re-organised States and Union Territories as mentioned below. Data for 1956 relate to all re-organised States. Data excludes the States of Jammu and Kashmir, Mysore and Manipur from 1957 to 1959 excludes Madhya Pradesh in 1958, excludes Rajasthan and Kerala in 1959, and excludes Jammu and Kashmir in 1960.

Table 194—

This table shows numbers of accidents and number of injuries (i.e. number of persons receiving injuries) in Mines. The data are collected under the Mines Act. Accidents have been classified into fatal and serious. A serious injury is one which involves, or in all probability will involve, permanent loss and injury to sight or hearing and fracture of limb and enforced absence of the injured person from work for a period exceeding 20 days. Complete statistics of minor injuries are not available. Data for 1950 relates to Part 'A' States and Part 'C' States of Ajmer, Coorg and Delhi. Data from 1951 cover whole of the Indian Union except Jammu and Kashmir.

Industrial Disputes.—The figures relate to disputes resulting in work stoppages and involving ten or more workers. A temporary stoppage of work by a group or all employees in a unit or temporary withholding of work from a group of employees, by an employer (or a group of employers) in a unit in connection with matters relating to employment or terms or conditions of employment is termed as an Industrial Dispute. As the statistics are collected on voluntary basis the coverage may not be complete particularly in sectors like construction, trade and services. The statistics cover both strikes and lock-outs but certain types of strikes like sympathetic strikes which are not connected with specific demands of workers are not included in the statistics. Upto 1956 data in general relate to former Part 'A' states and Part 'C' states of Ajmer and Delhi. Territories merged with Part 'A' states during this period have gradually been covered. From 1957 the data relate to whole of the Indian Union.

Table 195—

This table shows the State-wise distribution of number of disputes workers involved and number of man-days lost on account of the disputes.

The figures of number of workers involved relate to the maximum number of workers involved. The maximum number of workers involved is the number which was highest on any day during the course of work stoppage as known upto the date of reporting. The figures of man-days lost are calculated by adding up actual vacancies caused by the work-stoppage on each working day. Scheduled holidays during the period of work-stoppages are not taken into account in the calculation of man-days lost.

Table 196 —

This table shows the classification of industrial disputes by causes.

Table 197 —

Under the Workmen's Compensation Act, 1923 compensation is payable to workers employed in scheduled employments and drawing less than Rs. 400 per month, for injuries due to accidents resulting in death or disablement for more than 3 days provided that it is not caused through the fault of the worker himself. As all the injuries are not compensated, the number of compensated injuries do not reflect the total number of injuries occurring. Further, many of the establishments covered by the Workmen's Compensation Act fail to submit returns and hence information regarding number of compensated injuries and the amount of compensation paid is incomplete. With these limitations the table shows compensation paid to workers involved in industrial accidents under the Workmen's Compensation Act and excludes compensation of injuries paid under Employees State Insurance Act. These limitations affect the trend and comparability of statistics of compensated injuries.

Table 198—

This table shows progress of the labour training sponsored by the Ministry of Labour and Employment.

*Source: Director General of Employment and Training,
Ministry of Labour and Employment.*

- (1) Excluding Railways and personnel employed in Indian Embassies and Missions abroad. According to the Census of Central Government Employees, conducted by the Central Statistical Organisation figures for employment in Indian Embassies and missions abroad as on 30-6-1959 were 2,114 regular employees, and 2,760 locally recruited staff.
- (2) Includes all Gazetted and non-Gazetted officers holding posts of supervisory natures under administrative services, i.e., Office Superintendents, Head Clerks, etc., of Secretariats and other Offices and executive services, i.e., Superintendents of Excise, Deputy Superintendents of Police, Deputy Superintendents, Labour Supervisors, Excise Inspectors, etc.
- (3) Persons holding posts of ministerial nature such as Assistant, Senior or Junior clerks, Typists, Stenographers, etc. From January 1955, the title of group has been changed from Clerical to Ministerial, and includes non-gazetted administrative staff formerly shown under Administrative and Executive.
- (4) All skilled and semi-skilled operatives not included under the two categories above.
- (5) Including *Daftaries*, peons, etc.
- (6) Non-regular establishment includes persons paid from contingencies, work charged staff and the daily or monthly rated personnel.
- (a) Position as on 30th June 1960 after which compilation of data according to the given categories has been suspended.

Source : Dts. General of Employment & Training, Min. of Labour and Employment

(1) Relates to training centres run by the Ministry of Labour and Employment (D.G.E. & T.)

(2) There was no apprentices training scheme in operation at the end of 1950

(3) Includes women if any.

TRADE UNIONS

TABLES 199—203 :

Figures given in this Section relate to Trade Unions (registered under the Indian Trade Unions Act, 1926) that have submitted returns. Trade unions are divided into two broad-groups—workers unions and employers unions. Registration of unions under the Act is not compulsory. Data relate to the entire Indian Union but figures in respect of Jammu & Kashmir are not available. The figures are based on returns received only from about 50 to 60 *percent* of the total number of registered unions. The coverage of statistics is, therefore, incomplete and varies from year to year. Data regarding unregistered unions are not available.

Industrial classification, according to which information is collected, was revised in 1954-55. A followed revision was undertaken in 1957-58. The enlarged industrial classification is being followed from 1960-61 onwards, the breakdown is however available for groups in this classification, this too for states submitting returns according to this classification. Information is also shown separately for central-unions which operate at 'All-India level' and State-unions which are confined to states level activities.

Source : Labour Bureau,
Ministry of Labour and Employment.

(a) The difference is on account of the absence of information on opening and closing balances from Saurashtra.

(b) Relates to unions submitting returns.

(c) Excluding Rajasthan.

(d) Though 6,600 unions submitted the returns, information regarding membership is available for 6,588 unions only.

Though 6825 unions submitted returns information regarding membership is available for 6813 unions only.

VITAL AND PUBLIC HEALTH STATISTICS

Available information concerning vital and public health statistics in India is shown in the tables under this section. Data in greater detail are now published by the Registrar General, Ministry of Home Affairs and Ministry of Health, Government of India, and the various State authorities in the form of periodical reports. The information relates to all States of the Indian Union, unless otherwise specified. The latest year for which vital statistics are available is 1962. While the figures for the year 1961 & 1962 are shown in greater detail, corresponding figures for the earlier years are shown in totals only.

Tables 204 and 205:—

Table 204 shows State-wise distribution of birth rates classified into rural and urban, while table 205 shows the death rates per 1,000 of mid-year population, recorded in registration areas, where registration of births and deaths is compulsory. States of Assam, Bihar, Kerala, Mysore & Rajasthan which have a particularly deficient registration have been excluded in calculating All India rates. Rates are calculated by using the mid-year estimated population of registration areas. The All India rates for the years 1956 to 1957 are based on data for 10 States of Andhra Pradesh, Gujarat, Maharashtra, Delhi, Madras, Madhya Pradesh, Orissa, Uttar Pradesh, Punjab and West Bengal, while calculating rates for the years 1958 to 1962 the states of Delhi, Madhya Pradesh, Uttar Pradesh, West Bengal have been left out of the 10 states mentioned earlier and the States of Kerala and Mysore have been included.

In table 205 infant mortality rate is also shown which represents the number of deaths under one year of age per thousand live-births recorded in the same period.

Table 206 :—

This table shows death rate per 1,000 of population, according to cause of death. The more commonly known epidemics are shown separately, while the remaining diseases are grouped together only in broad groups.

Table 207 :—

This table shows the number of hospitals and dispensaries together with the number of patients treated indoor and outdoor, and the number of beds available.

Table 208 :—

This table gives the actual number of nursing personnel, registered with nursing Councils or boards, according to different categories.

Table 209 :—

Number of patients treated in various hospitals and dispensaries by diseases, for different States, is given in this table. The classification of diseases has been brought into conformity with the International Classification since 1956.

Table 210 :—

Data concerning mental hospitals (state-wise) are shown in this table.

(d) Information relates to 2 mental hospitals.

(e) Information relates to 5 mental hospitals.

EDUCATION

The information contained in this section relates to all States of the Indian Union. Statistics relating to North-East Frontier Agency and Naga Hills and Tuensang Area, now Nagaland, have been included from 1954-55 and 1958-59 respectively. In tables 213 to 222, All-India totals are given for years commencing 1950-51, while statewise break-down is given for the latest year, i.e., 1960-61. The figures in table 223, however, show total literate population in India according to 1961 census. The figure relating to the year 1960-61 in tables 213-222 are provisional. The academic year in these tables is taken to coincide with financial year ending 31st March.

TABLE 211—

The summary table gives a general idea of the educational development in the country from 1950-51 to 1960-61. As co-education is largely in vogue the information, regarding the number of institutions for men and women does not mean that only men and women are exclusively studying in them. However, to give an idea of the comparative growth of education among men and women, the total number of men and women scholars in all institutions are also given separately. The figures relate to recognized institutions only.

The terms "Men" and "Women" connote "Boys" and "Girls" wherever relevant.

Information about expenditure relates to recognised institutions only. By direct expenditure is meant expenditure directly connected with the maintenance of an institution, viz. salary of teachers and other recurring expenditure; while indirect expenditure means all expenditure on inspections, direction, buildings, furniture, scholarships and other miscellaneous items. Its nature is such that it cannot be apportioned to each type of institution.

TABLE 212—

Number of Recognised Educational Institutions.—In this table data on various types of recognised institutions for men and women are given for the period 1950-51 to 1960-61. *Recognised* institutions are those which are recognised by the Government or by a University or a Board of Secondary and Intermediate Education, constituted by law and offer the prescribed courses of study. They are open to inspection and general direction by the Education Department of Government and their pupils are ordinarily eligible for admission to public examinations and tests held by the Department or University or the Board. Only those research institutions are taken which provide facilities for teaching.

TABLE 213—

Number of Scholars in Recognised Institutions by Stages of Instructions (General Education).—This table has two parts. The first part shows the number of men and women scholars receiving instructions at various stages of general education and the other gives the number of men and women

scholars receiving instructions in various subjects or professional and special education. For definiteness, the enrolment in the institutions as on 31st March each year is taken.

TABLE 214—

Expenditure on Recognised Educational Institutions (by sources).—This table gives the distribution of total expenditure according to sources from which finances are drawn. These are mainly from Government funds, district board funds, municipal funds, fees and endowments, etc. In calculating the expenditure from Government, District or Municipal Board funds, all payments or contributions from fees or other sources, which are credited to these funds, are deducted.

TABLE 215—

Expenditure (by types of education).—This table shows the total expenditure on recognised institutions. Distribution of direct expenditure is given by types of institutions while totals, for all institutions for men and women, are given for indirect expenditure.

TABLE 216—

Teachers in Educational Institutions.—This table shows the number of men and women teachers in different types of recognised institutions, viz., primary schools, secondary schools, technical and special schools and in colleges and Universities, etc. Teachers in schools for general education are classified to show how many are trained and how many untrained.

TABLE 217—

Number of Institutions and Scholars from Rural Areas.—This table shows progress of education in rural areas, i.e., the areas outside the limits of municipal, cantonment, notified and small-town committees. The various types of institutions for men and women have been enumerated. The enrolment shown in this table relates to the number of scholars (men and women separately) coming from rural areas, irrespective of whether they are studying in institutions located in rural areas or urban areas.

TABLE 218—

Expenditure on Rural Education (by Sources).—Classification of expenditure on rural education, both direct and indirect, is given in this table by sources.

TABLE 219—

Examination Results.—This table gives State-wise distribution of scholars who passed matriculation and other university examinations. This includes the private candidates also.

TABLE 220—

Education of Scheduled Castes and Backward Tribes.—This table shows the progress of educational facilities including scholarships and stipends given to scheduled castes, scheduled tribes and other backward classes. The number of pupils shown here is inclusive of those reading in institutions meant for all communities. The number of institutions and pupils given in this table are also covered in earlier tables.

TABLE 221—

This table shows total literate population in India, according to educational standards and sex as recorded in 1961 census.

JUDICIAL AND ADMINISTRATIVE STATISTICS

Tables 224 - 241

This section presents information relating to the administration of Civil and Criminal Justice, Registration, Police and Prisons. The data have been compiled from the returns furnished by the State Governments.

Figures relate to the calendar years unless otherwise mentioned. Totals for the latest two years relate to the States for which data are available. Figures given against Bombay for 1959 relate to O'd Bombay State while those given against Maharashtra for 1960 are inclusive of figures for the period 1-1-60 to 30-4-60 relating to O'd Bombay State.

The data from the year 1957 are according to re-organised States.

NO. 224—NUMBERS OF JUDICIAL DIVISION AND NUMBER OF OFFICERS EXERCISING APPELLATE OR ORIGINAL JURISDICTION IN INDIA

ELECTORAL STATISTICS

Under the Indian Constitution, there shall be a Parliament for the Union, consisting of the President and two Houses to be known respectively as the Council of States (*Rajya Sabha*) and the House of the People (*Lok Sabha*). Similarly in each State there shall be a legislature consisting of either one House known as the Legislative Assembly (*Vidhan Sabha*) or two houses known as the Legislative Council (*Vidhan Parishad*) and the Legislative Assembly (*Vidhan Sabha*).

The following tables bring out broadly the salient characteristics of the electorate in the country. For this, the number of voters, seats allotted and votes polled for each State for the purpose of representation in the Parliament as also in the States Legislatures have been given.

Tables 242-243.

Elections to the House of the People and the State Legislative Assemblies.

In these tables are shown the number of seats and voters in each State for the purpose of election to the House of the People and the Legislative Assemblies. The election to the House of the People and to the Legislative Assembly of every State shall be on the basis of adult suffrage; that is to say, every person who is a citizen of India and has attained the age of 21 years, if not otherwise disqualified, shall be entitled to be a voter at any such election. For the purposes of 1962 elections, the States have been grouped or formed into single member territorial constituencies.

In the two tables Col. 3 shows total number of electors (voters) in all constituencies whereas Col. 4 shows the number of votes polled. The percentage of votes polled to total votes in contested constituencies is shown in Col. 6. This indicates the extent to which the voters exercised their franchise. The difference between "votes polled" and "valid votes polled" shows that a number of votes polled were either wrongly polled or rejected.

The Legislative Assembly of each State is to be composed of members chosen by direct elections. The total number of members in the Legislative Assembly of a State shall not in any case be more than 500 or less than 60. The strength of the electoral college in the Union Territories is laid down in the provisions of the Representation of the People Act, 1950.

Table 244.

Representation in the Legislative Councils together with Constituencies for the purpose.

Representation in the Legislative Council of each State, where there is such a Council will be confined to Local Authorities, University Graduates and Teachers, Nominees of the Governor and elected representatives of the Legislative Assembly. This table shows the proposed strength of this Council in each State together with the number of constituencies for the purpose of elections.

No. 242.—ELECTIONS TO THE LOK SABHA
(House of the People)

Years/States	No. of seats	No. of electors	No. of votes polled	No. of valid votes polled	Percentage of votes polled (Col. 4 to Col. 3)

(1) Confined to Local Authorities, Graduates and Teachers.

(a) Elections were conducted from January to June 1952.

CLIMATE

Meteorological data are recorded at some 380 observatories of the Indian Meteorological Department and over 3,200 rain recording stations maintained by the different State Governments.

The meteorological sub-divisions shown correspond more or less to the chief political divisions of India. They underwent revision during 1950 as a result of merger of states and formation of new States and again with effect from first January, 1957 consequent on reorganisation of States.

Rainfall—

Table 245:—

This table shows the normal and actual monthly rainfall during the years 1961 and 1962 and actual rainfall during the years 1951 and 1954 to 1962 for the various meteorological sub-divisions of the country. The figures for normal rainfall are averages of rainfall data available up to 1940. The minimum length of the period used for working out the normal rainfall of any station is five years and the maximum is eighty years. Normals of rainfall of about seventy-five per cent of the rain-gauge stations whose normals have been utilised in calculating the normals of rainfall for the various sub-divisions are, however, based on data for thirty years or more.

Actual rainfall is recorded at 0830 hours I.S.T. each day throughout the country. The amounts measured give the rainfall of previous 24 hours. The rainfall data are tabulated at the offices of the State Officers controlling registration of rainfall and published in the State Gazettes. They are subsequently consolidated and issued by the Indian Meteorological Department in the form of two publications each year, viz. (i) Daily Rainfall of India and (ii) Monthly Rainfall of India.

Temperature—

Table 246:—

This table contains monthly figures for mean, maximum and minimum temperatures at selected centres. Observations of temperature of air in shade are taken at most of the observatories twice a day at 0830 and 1730 hours I.S.T. For this purpose, thermometers are installed at a height of 4 ft. above ground in Screens which provide a free access to the air but, at the same time, protect the thermometers from direct rays of sun.

Table 247:—

This table gives monthly figures of mean temperatures for meteorological sub-divisions. For this purpose the average of the maximum and minimum temperatures for a station is taken as the mean temperature and the mean temperature over the several stations in the sub-division are averaged to obtain the mean temperature of the sub-division.

Humidity—

Table 248:—

Relative humidity is the measure of the amount of water vapour present in the atmosphere relative to the corresponding amount for saturation. It is recorded at the principal observatories, at 0830 and 1730 hours I.S.T.

These data are published in greater detail in the "Monthly Weather Reports" and the "India Weather Review—Annual Summary", brought out by the Meteorological Department.

APPENDIX

- APPENDIX—I** . . . Working of Mines in India: This table is a supplement to table No. 47 and contains total as well as mineral-wise details of working of mines in India for the year 1961.
- APPENDIX—II & III** . . . Annual Survey of Industries: These tables give state as well as industry-wise information (Final Results) on important characteristics of manufacturing industries as published in the Annual Survey of Industries (Summary) for the year 1961. Provisional results of the survey are already shown in tables 48-49. Explanatory note in regard to these tables is shown at pages 119-120 against tables 48-49.
- APPENDIX—IV** . . . This table gives the actual number of medical practitioners in allopathy, registered with the medical councils in the States. Information relating to States where there are no Medical Councils, has not been included.
- APPENDIX—V** . . . Five Year Plans—Principal targets and achievements. This table is freshly added to this issue. It represents targets as well as achievements during First, Second and Third Plan (achievements upto 1962-63) periods of 86 items under the major heads: (i) agricultural production; (ii) forest and soil conservation; (iii) community development; (iv) irrigation by crops; (v) power; (vi) mining; (vii) industrial production; (viii) mechanical, electrical engineering and chemical and allied industries; (ix) timber and food industries; (x) transport and communications; (xi) port and harbour; (xii) post and telegraph; (xiii) social services education; and (xiv) health.

*A dash (—) indicates that target was not fixed.

(a) Includes 0.1 million acres for which details are not available.

(b) Estimated.

(c) For calendar Year 1950.

(d) For calendar year 1955.

(e) The figure does not include the places in J. & K. State and Pondicherry. No. of towns and villages electrified in the above two States have, however, been included in the places electrified. One place over 1,00,000 population in J. & K. State has also been included in the electrified places.

(f) Figures of electrified places in Bihar, Punjab, U.P. and Union territories is estimated.

(g) Figures refer to calendar years.

(h) Capacity target against which production target is 30.0 million tons.

(i) Figures on achievements for 1960-61 are provisional.

47. Electric transformers (33 Kv and below)	Mill KVA	0.18	0.45	0.63	1.50	1.39
48. Electric motors (200 h.p. and below)	Mill h.p.	0.10	0.32	0.27	0.80 to 1.00	0.73
49. Electric fans	Mill nos.	0.20	0.32 to 35	0.29	0.60	1.06
50. Radio receivers	'000 nos.	54.0	350	102.0	300	279.1
51. Heavy electrical equipment in the public sector	Rs. crores	—	—	—	—	0.21

* A dash (—) indicates that target was not fixed.†

(a) Including 3 wheelers and mopeds.

(b) By working the capacity on three shifts.

(c) Figures relate to calendar years.

(d) Includes 0.25 milln. cycles to be produced by the small scale sector.

(e) Negligible.

(f) An additional 0.5 million bicycles are expected to be produced in the small scale sector.

(g) Includes 80,000 domestic sewing machines to be produced by the small scale sector

(h) An additional 150,000 sewing machines are expected to be produced in the small scale sector

(i) Relates to Five Year period.

(f) Capacity for engineering industries is estimated on the basis of double shift operation.

(v) Figures are for 300 h.p. and below.

FIVE YEAR PLANS
